- **A table contain the following columns:**

- Checkbox icon
  - Multi selection
- Item code
  - It displays the item code
  - Clickable
  - When clicked, the user is navigated to the "[Item details screen](#)"
- Item name
  - It displays the item name
- Item Group
  - It displays the item group
- Status
  - Displays one of the following values:
    - Active
    - Disabled
    - Variant
    - Template
    - Bundle
    - End of life
- Unit of measure
- Available quantity
- **Available Actions**
  - **View**
    - To display the item details, the user clicks on any area within the row, except for the the **item code** field
    - When clicked, a pop-up appears displaying the item details

- **Note:** when an item is selected , an action bar appears showing the following actions:

- Edit
  - Button
  - When clicked , a popup appears containing the following fields.
    - **Field**
      - DDL
      - To select the field you want to edit
      - Link "[Item](#)" doctype
      - Single selection
      - Mandatory
    - **Value**
      - Dynamic field
      - Based on the selected option from the first dropdown field, the second field shall :
        - Dynamically change it's input type
        - Be marked as either mandatory
        - Or optional
        - Apply the corresponding validation rules

- Mandatory.
- Accepts letters, numbers, and special characters.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- **Note:** if the field is left empty, it will be the same as **Item Code**
- An error message will appear if the entered text is less than the minimum length.
- An error message will appear if an invalid item name is entered.

- **Item group**

- Link “Item Group” doctype
- Mandatory
- It displays only child item groups (is Group=0)
- An error message will appear if the field is left empty.

- **Default unit of measure**

- Link “UOM” doctype
- Mandatory
- An error message will appear if the field is left empty.

- **Checkbox options**

- **Has Variants**

- Checkbox
- If the user wants to create different variants of the same base item
- Optional
- **Note:**
  - It appears only when “**Is Fixed Asset = 0**”
  - If this item has variants, then it cannot be selected in sales orders etc.
  - When checked,
    - The “**Variants**” section is displayed

- **Maintain stock**

- Checkbox
- If the user wants the system to track the stock of this item within the warehouses.
- Optional
- **Note:**
  - It appears only when “**Is Fixed Asset = 0**”
  - When checked,
    - the **Opening Stock** field is displayed
    - The **Inventory** tab is displayed
    - The system creates a Stock Ledger Entry for every transaction related to this item

- **Is Fixed Asset**

- Checkbox
- If the item is an asset or part of the company’s assets
- Optional
- **Note:**
  - it appears only when “**maintain stock = 0**”

- When checked,
      - The “**Auto Create Assets on Purchase**” checkbox is displayed
      - **Asset category** field is displayed
  - **Auto Create Assets on Purchase**
    - Checkbox
    - The system automatically creates an Asset record in the Asset module when the item is purchased
    - Optional
    - **Note:**
      - It appears only when “**Is Fixed Asset = 1**”
      - When checked
        - “**Create Grouped Asset**” checkbox is displayed
        - **Asset Naming Series** field is displayed
  - **Create Grouped Asset**
    - Checkbox
    - If the user wants to create a single Asset represents the entire group (Grouped Asset)
    - Optional
    - **Note:**
      - It appears only when “**Auto Create Assets on Purchase= 1**”
- **Variants**
  - **Note:** Variants section is displayed only when “**Has Variants=1**”
  - **Variant of**
    - Label
    - Displays which item this variant belongs to
  - **Variants based on**
    - DDI
    - Contains the following values:
      - Item attribute
        - When selected, the variant attribute table is displayed
      - Manufacturer
    - Mandatory
    - Single selection
    - If the field is left empty, an error message will appear.
    - **Note:**
      - It is displayed only when the item is a template and not a variant.
      - the “Variant based on” values (Item attribute / Manufacturer ) can’t be changed if variants already exist.
  - **Variant Attribute**
    - A table contain the following columns:
      - **Checkbox icon**
        - Multi selection
      - **No.**
        - Displays the ordering of items in the table

- **Attribute**

- Searchable DDL
- Link “Item Attribute” doctype
- singleselection
- Mandatory
- If the field is left empty, an error message will appear.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Setting**

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name    |
|----------------|
| Attribute      |
| Variant of     |
| Numeric values |

#### Disabled

**Note:** it means that the system allows the user to disable all variants associated with this item and generated from the same attribute.

From **range**

Increment

To **range**

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an item is selected , an action bar appears showing the following action:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the previously mentioned fields:

| Field Name                | Options                                                                                                                |
|---------------------------|------------------------------------------------------------------------------------------------------------------------|
| <a href="#">Attribute</a> | <ul style="list-style-type: none"> <li>• <a href="#">Link “item Attribute” doctype</a></li> <li>• Mandatory</li> </ul> |
| Disabled                  | <ul style="list-style-type: none"> <li>• Checkbox</li> <li>• Optional</li> </ul>                                       |

■ **Add Row**

- Button
- To add a new row in the table
- When clicked, a new row is added to the table.

■ **Note:**

- Variant attribute table is displayed only when, “**Variant based on=Item Attribute**”
- Variant attribute table can’t be deleted or changed if variants already exist.

● **Asset Category**

- Searchable DDL
- To select the category of the fixed Asset
- [Link “Asset Category” doctype](#)
- Mandatory (If “**Is Fixed Asset = 1**”)
- Single selection
- An error message will appear if the field is left empty.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

● **Asset Naming Series**

- DDL
- Displays all series added to Asset doctype
- Single selection
- Mandatory (If “**Auto Create Assets on Purchase= 1**”)
- An error message will appear if the field is left empty.

● **Opening Stock**

- Text input field
- For entering the opening stock
- Optional
- Accepts integers and decimal numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- **Note:**
  - It appears only if:
    - “**maintain stock = 1**”

- **Creating the item for the first time.**
  - When the user enters a value in the opening stock
    - The “[Default Valuation Rate](#)” field will be **mandatory**
  - When the user clicks on “Save” button:
    - If the “[Default Valuation Rate](#)” field is left empty
      - An error message appears
    - The system automatically creates a **Stock Entry** and its type **material receipt**
    - The system posts it into the company’s **default warehouse**
- **Standard Selling Rate**
  - Text input field
  - The user can define a default selling price for the Item, which will be automatically used in sales transactions such as Sales Orders and Sales Invoices.
  - **Note:** When the user enters a value in the Standard Selling Rate field and saves the Item , the system automatically creates an Item Price record using the entered rate. This price is then automatically fetched and displayed in Sales Orders and Sales Invoices whenever the Item is selected.
  - Optional
  - Accepts integers and decimal numbers only.
  - Minimum length: 2 characters.
  - Maximum length: 100 characters.
  - Once the maximum limit is reached, further input will be prevented.
  - **Note:**
    - It appears only :
      - when creating the item for the first time
      - When “**maintain stock = 1**”
- **Description**
  - Text area
  - For adding a detailed description for the item
  - Optional
  - Accepts letters, numbers, and special characters.
  - Minimum length: 3 characters.
  - Maximum length: 500 characters.
  - Once the maximum limit is reached, further input will be prevented.
  - An error message will appear if the entered text is less than the minimum length.
  - An error message will appear if invalid data is entered.
  - **Note:** The text from the Item Code will be fetched by default
- **Brand**
  - DDL
  - To select a brand associated with the item
  - Link “Brand” doctype
  - Optional
  - Single selection
- **Units of measure**
  - This section is used to add additional Units of Measure for the item alongside the Default Unit of Measure, while defining the Conversion Factor between each unit

and the base unit.

■ **For Example:**

- Default UOM >> Nos
- Added UOM >> Box , conversion factor = 24
- The system considers that 1 box = 24 Nos.

○ **A table contain the following columns:**

■ **Checkbox icon**

- Multi selection

■ **No.**

- Displays the ordering of items in the table

■ **UOM**

- Searchable DDL
- Link “UOM” doctype
- Single selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

■ **Conversation factor**

- Text input field
- To define additional UOM for the item and link them to the base UOM.
- Mandatory if a UOM value is selected
- Accepts letters, numbers, and special characters.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .
- If the field is left empty, an error message will appear.

■ **Setting**

- Clickable icon
- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns

- Button
- For adding or removing columns from the table
- When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
- These columns are:

| Column Name       |
|-------------------|
| UOM               |
| Conversion Factor |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an item is selected , an action bar appears showing the following action:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the previously mentioned fields for editing
- **Add Row**
  - Button
  - To add a new row in the table
  - When clicked, a new row is added to the table.
- **Save**

- For select the default material request type
- It contains the following values:
  - Purchase
  - Material transfer
  - Material issue
  - Manufacture
  - Customer provided

- Single selection
- Optional
- Default = Purchase

■ **Warranty period in days**

- Text input field
- To define the item's warranty period.
- Optional
- Accepts numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .
- The value can't be negative

■ **Weight per unit**

- Text input field
- To define the item's weight per unit.
- Optional
- Accepts integer and decimal numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .
- The value can't be negative

■ **Weight UOM**

- Searchable DDL
- Link "UOM" doctype
- Single selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

■ **Allow negative stock**

- Checkbox
- If the user wants to allow the item quantity to become negative in the stock
- Optional
- **Note:** When checked, the item will be allowed to go negative even

if negative stock is disabled from Stock Settings.

■ **Allow stock Reservation**

- Checkbox
- When checked, this item can be reserved in transactions.

● **Barcodes**

○ A table contain the following columns:

■ **Checkbox icon**

- Multi selection

■ **No.**

- Displays the ordering of items in the table

■ **Barcode type**

- DDL
- For selecting the barcode type
- It contains the following values:
  - EAN-13
  - UPC-A
  - CODE-39
  - GTIN
  - GS1
- Single selection
- Optional

■ **Barcode**

- Text input field
- For entering the barcode
- Mandatory if the “barcode type” value is selected
- Accepts letters, numbers, and special characters.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .
- If the field is left empty, an error message will appear.

● **Note:**

- The system shall validate the entered Barcode value based on the selected Barcode Type.
- The system displays an error message if the entered barcode format does not match the selected Barcode Type.
- The system shall prevent saving invalid barcode values.
- Duplicate barcodes are not allowed for multiple Items.

| Barcode type | Validation rule                         |
|--------------|-----------------------------------------|
| EAN-13       | Accepts exactly 13 numeric digits only. |

|         |                                                                                       |
|---------|---------------------------------------------------------------------------------------|
| UPC-A   | Accepts exactly 12 numeric digits only.                                               |
| CODE-39 | Accepts uppercase letters, numbers, and special characters (- . \$ / + % SPACE) only. |
| GTIN    | Accepts numeric digits only.                                                          |
| GS1     | Accepts numeric digits only.                                                          |

#### ■ UOM

- Searchable DDL
- Link “UOM” doctype
- Single selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

#### ■ Setting

- Clickable icon
- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name  |
|--------------|
| Barcode      |
| Barcode type |
| UOM          |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an item is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the previously mentioned fields for editing
- **Add Row**
  - Button
  - To add a new row in the table
  - When clicked, a new row is added to the table.
- **Auto Re-Order**
  - A table contain the following columns:
    - **Checkbox icon**
      - Multi selection
    - **No.**
      - Displays the ordering of items in the table

■ **Check Availability in warehouse**

- Searchable DDL
- Link “Warehouse” doctype
- Single selection
- Mandatory, where (is group=1)
  - It means that only parent warehouses are displayed in this DDL
- If the field is left empty, an error message will appear.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

■ **Request for**

- Searchable DDL
- Link “Warehouse” doctype
- Single selection
- Mandatory, where (is group=0)
  - It means that only child warehouses are displayed in this DDL
- If the field is left empty, an error message will appear.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

■ **Re-order level**

- Text input field
- For entering the minimum stock quantity, when the quantity reaches this number, the system will automatically start the re-order process.
- Mandatory
- Accepts numbers only
- Minimum length: 1 character.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .
- If the field is left empty, an error message will appear.

■ **Re-order Quantity**

- Text input field
- For entering the quantity that the system will order during the re-order process.
- Original field name in ERPNext “Re-order Qty”
- Mandatory
- Accepts numbers only
- Minimum length: 1 character.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error

message appears .

- If the field is left empty, an error message will appear.

#### ■ **Material Request Type**

- DDL
- For selecting the Material Request Type
- It contains the following values :
  - Purchase
  - Transfer
  - Material issue
- Single selection
- Mandatory
- If the field is left empty, an error message will appear.

#### ■ **Setting**

- Clickable icon
- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name                     |
|---------------------------------|
| Check Availability in warehouse |
| Request for                     |
| Re-order level                  |

Re-order Quantity

Material Request type

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an item is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the previously mentioned fields for editing
- **Add Row**
  - Button
  - To add a new row in the table
  - When clicked, a new row is added to the table containing the previously mentioned columns.
- **Note:**
  - Auto re-order must be enabled from the stock setting for this feature to work.
  - The system automatically generates a **Material Request** immediately when the **current quantity reaches the Re-order level**.
  - **Re-order level Calculation**
    - The system shall calculate the Reorder Level using the following formula:
    - **Where:**
      - **Safety Stock:** The minimum reserved stock quantity

maintained to avoid stock shortages.

- **Average Daily Consumption:** The average quantity consumed or sold per day.
- **Lead Time:** The number of days required by the supplier to deliver the item.

- **Example:**

- Safety Stock = 20 Units  
Average Daily Consumption = 5 Units  
Lead Time = 4 Days
- Reorder Level =  $20 + (5 \times 4) = 40$
- The system shall trigger the reordering process when the available stock quantity reaches 40 units.

- **Serial Numbers / Batches**

- **Note:** The system shall allow enabling Serial Number and Batch features only when the "Enable Serial and Batch No for Item" setting is enabled in Stock Settings.

- It contains the following:

- **Has Batch Number**

- Checkbox
    - If the item's batches have numbers.
    - Optional
    - Original field name in ERPNext "Has Batch No"

- **Note:**

- When checked,
      - The following checkboxes are displayed:
        - Automatically Create New Batch
        - Has Expiry Date
        - Retain Sample

- **Auto create new batch**

- Checkbox
    - If the user wants the system to generate the batch number automatically
    - Optional
    - Original field name in ERPNext "Automatically Create New Batch"

- **Note:**

- It appears only when "**Has Batch Number =1**"
    - When checked, The **Batch number series** field is displayed

- **Batch Number Series**

- Text input field
    - For entering the batch number series that the system will use to automatically generate new batches later.
    - Optional
    - Accepts letters, numbers, and special characters.
    - Minimum length: 2 characters.
    - Maximum length: 100 characters.
    - Once the maximum limit is reached, further input will be prevented.

- If the entered text is less than the minimum length, an error message appears .
- **Notes:**
  - It appears only when “**Auto Create New Batch=1**”
  - If a batch number series is entered:
    - The system will use the entered “**Batch Number Series**” and override the default series configured in the **Inventory Settings**.
  - If no batch number series is entered:
    - The system will use the default batch number series configured in the inventory settings.

■ **Has Expiry date**

- Checkbox
- In case the item has an expiry date
- Optional
- **Notes:**
  - It appears only when “**Has Batch Number=1**”
  - When checked, “**Shelf Life In Days**” field is displayed

■ **Shelf Life In Days**

- Text input field
- To enter the number of days during which the item batch remains valid before its expiry date
- Mandatory if the “**Has Expiry Date**” checkbox is checked.
- Accepts numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .
- If the field is left empty, an error message will appear.
- **Notes:**
  - It appears only when “**Has Expiry Date=1**”

■ **Retain Sample**

- Checkbox
- To enable the retain sample option
- Optional
- **Notes:**
  - It appears only when “**Has Batch Number =1**”
  - When checked, “**Max Sample Quantity**” field is displayed

■ **Max Sample Quantity**

- Text input field
- To enter the max quantity number of samples that will be retained.
- Mandatory if the “**Retain Sample**” checkbox is checked.
- Accepts numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.

- **Default Warehouse**

- Searchable DDL
      - Link “Warehouse” doctype
      - Single selection
      - Mandatory,
      - **Note:** the default value is **Stores warehouse** (Example: Stores - Azrk)
      - If the field is left empty, an error message will appear.
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Default Price List**

- Searchable DDL
      - Link “Price list” doctype
      - Single selection
      - Optional,
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Setting**

- When clicked, a pop up appears contains the following options :
        - Rearranging table columns using drag and drop functionality.
          - Users can click and hold a column header , then drag and drop it into the desired position within the table.

- Column width
  - Text input field
  - For entering or edit the column width
  - Accepts numbers only
  - Minimum length: 1 character.
  - Maximum length: 3 characters.
  - Default value = 3
- Add / Remove columns
  - Button
  - For adding or removing columns from the table
  - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
  - These columns are:

| Column Name                           |
|---------------------------------------|
| Company                               |
| Default Warehouse                     |
| Default Price List                    |
| Default Discount Account              |
| Default Inventory Account             |
| Inventory Account Currency            |
| Default Buying Cost Center            |
| Default Supplier                      |
| Default Expense Account               |
| Default Provisional Account (Service) |

Default Selling Cost Center

Default Income Account

Default COGS Account

Deferred Expense Account

Deferred Revenue Account

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved

- **Add Row**
  - Button
  - To add a new row in the table
  - When clicked, a new row is added to the table.

- **Taxes**

- A table contain the following columns:

- **Checkbox icon**

- Multi selection

- **No.**

- Displays the ordering of items in the table

- **Item Tax Template**

- Searchable DDL
      - Link “Item tax template” doctype
      - Single selection
      - Mandatory
      - If the field is left empty, an error message will appear.
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Tax Category**

- Searchable DDL
      - Link “Tax Category” doctype
      - Single selection
      - Optional
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Valid From**

- Date calendar picker
      - To determine the tax start date
      - Optional

- **Minimum Net Rate**

- Text input field
      - To enter the minimum net invoice amount at which this tax is applied
      - Optional
      - Accepts integers and decimal numbers only.
      - Minimum length: 2 characters.
      - Maximum length: 100 characters.
      - Once the maximum limit is reached, further input will be prevented.
      - If the entered text is less than the minimum length, an error message appears .

- **Maximum Net Rate**

- Text input field
      - To enter the maximum net invoice amount at which this tax is applied
      - Optional
      - Accepts integers and decimal numbers only.
      - Minimum length: 2 characters.
      - Maximum length: 100 characters.

- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .

#### ■ Setting

- Clickable icon
- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name       |
|-------------------|
| Item tax template |
| Tax category      |
| Valid from        |
| Minimum net rate  |
| Maximum net rate  |

- Users can show or hide columns by selecting or

- If the entered text is less than the minimum length, an error message appears .

- **Setting**

- Clickable icon
- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name             |
|-------------------------|
| Supplier                |
| Supplier Reference Code |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- **“Update”** button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved

- Material Request
- Request for Quotation
- Supplier Quotation
- Purchase Order
- Purchase Invoice
- Purchase Receipt
- Quotation
- Sales Order
- Sales Invoice
- Delivery Note
- Stock Entry
- Stock Reconciliation
- **Single Variant**
  - Button
  - **Note:** It's displayed only when the item is based on **item attribute**
  - When clicked, a pop up appears containing the attributes selected in the variant attributes table, and the user must select at least one attribute value
- **Multiple Variants**
  - Button
  - **Note:** It displayed only when the item is based on **item attribute**
  - When clicked, a pop up appears containing the attributes selected in the variant attributes table, and the user must select at least one attribute value
  - **The user can select multiple values**
- **Variant**
  - Button
  - **Note:** It displayed only when the item is based on **Manufacturer**
  - When clicked, a pop up appears containing the following actions:
    - **Manufacturer**
      - Searchable DDL
      - Link “Manufacturer” doctype
      - Single selection
      - Mandatory,
      - If the field is left empty, an error message will appear.
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Manufacturer part number**

- Text input field
- For entering the manufacturer part number
- Optional
- Accepts numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .

- **Create (Button)**

- Button
- To create the variant
- When clicked, If all required data is entered correctly and completely: The variant is created successfully.
- If incorrect or incomplete data is entered: A validation error message is displayed for each invalid field.

- Single selection
- Optional

- **Assign**

- Button
- When clicked, a pop up appears containing the following actions:
  - **Assign to me**
    - Checkbox
    - For assigning the item to me
    - Optional
    - When checked, the system automatically populate the “Assign to” field with the current user’s name
  - **Assign to**
    - Searchable DDL
    - Link “User” doctype
    - Multi selection
    - Mandatory,
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Assign to user group**
    - Searchable DDL
    - Link “User Group” doctype
    - Multi selection

#### ■ Print

- Button
- To print the item details
- When clicked, a pop up appears containing the following values:
  - **Letter Head**
    - Searchable DDL
    - Link “Letter Head” doctype
    - Single selection
    - Mandatory ,
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Print Format**
    - Searchable DDL
    - Link “Print Format” doctype
    - Single selection
    - Mandatory ,
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Page Size**
    - DDL
    - For selecting the page size
    - Contains the following values:
      - A0
      - A1
      - A2
      - A3
      - A4
      - A5
      - A6
      - A7
      - A8
      - A9
      - B0
      - B1
      - B2
      - B3
      - B4
      - B5

- B6
- B7
- B8
- B9
- B10
- C5E
- Comm10E
- DLE
- Executive
- Folio
- Ledger
- Legal
- Letter
- Tabloid
- Custom

- **Note:** the default value is **Read only**
- Single selection
- Mandatory
- If the field is left empty, an error message will appear.

○ **Language**

- Searchable DDL
- Link “Language” doctype
- Single selection
- Mandatory ,
- If the field is left empty, an error message will appear.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

○ **(Print) Button**

- Button
- To print the item details
- When clicked,
  - If all required data is entered correctly and completely:
    - The item is printed successfully.

- **Add Button**
    - Button
    - To add a new activity
    - When clicked,
      - If all required data is entered correctly and completely:
        - A new activity log entry is created.
        - The activity is recorded with the name of the user who performed it.
      - If incorrect or incomplete data is entered:
        - A validation error message is displayed for each invalid field.
  - **Cancel Button**
    - When clicked,
      - The current operation is canceled.
      - Any unsaved changes are discarded.
- **All Activities**
  - Section
  - Displays all activities related to the selected item
  - The user can view:
    - The activity type
    - Date & time
    - The activity details
    - Files attached
  - **Notes:**
    - The activity tab is available only in the item details screen and is not displayed while creating a new item.
    - When the user creates a new item for the first time, The Activity tab remains empty. Once the Item is saved, **the Item Creation activity is automatically logged and displayed in the Activity tab.**
    - After the item is created, the system automatically starts recording all actions performed on the item, such as:
      - Item creation
      - Field updates
      - Status changes
      - Related transactions
    - Once actions are performed on the item, the activity tab displays the recorded history in chronological order.
    - Each log entry may include:
      - The activity type
      - Date & time
      - The activity details
      - Files attached
    - System-generated logs are read-only and cannot be edited or deleted by any user.
    - User-created logs can be edited or deleted only by the user who created them.

- Optional
- Accepts integers and decimal numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.

- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .

#### ■ **Maximum Net Rate**

- Text input field
- To enter the maximum net invoice amount at which this tax is applied
- Optional
- Accepts integers and decimal numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .

#### ■ **Setting**

- Clickable icon
- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name       |
|-------------------|
| Item tax template |
| Tax category      |
| Valid from        |
| Minimum net rate  |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

- When clicked,
  - If all required data is entered correctly and completely:
    - The item group is shared with the selected user(s) successfully.
    - A notification is sent to the selected user.
  - If incorrect or incomplete data is entered:
    - A validation error message is displayed for each invalid field.

■ **Print**

- Button
- To print the item group details
- When clicked, a pop up appears containing the following values:
  - **Letter Head**
    - Searchable DDL
    - Link “Letter Head” doctype
    - Single selection
    - Mandatory ,
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Print Format**
    - Searchable DDL
    - Link “Print Format” doctype
    - Single selection
    - Mandatory ,
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Page Size**
    - DDL
    - For selecting the page size
    - Contains the following values:
      - A0
      - A1
      - A2
      - A3
      - A4
      - A5
      - A6
      - A7
      - A8

- A9
- B0
- B1
- B2
- B3
- B4
- B5

- Executive
- Folio
- Ledger
- Legal
- Letter
- Tabloid
- Custom

■ **Note:** the default value is **A4**

■ Single selection

■ Mandatory

■ If the field is left empty, an error message will appear.

○ **Language**

■ Searchable DDL

■ Link “Language” doctype

■ Single selection

■ Mandatory ,

■ If the field is left empty, an error message will appear.

■ **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

○ **(Print) Button**

■ Button

■ To print the item group details

■ When clicked,

- If all required data is entered correctly and completely:

- The item group is printed successfully.

- If incorrect or incomplete data is entered:

- A validation error message is

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

- For adding an abbreviation to the Attribute.
- Mandatory
- Accepts letters, numbers, and special characters.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- An error message will appear if the entered text is less than the minimum length.
- An error message will appear if invalid data is entered.
- If the field is left empty an error message appears.

#### ■ Setting

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using **drag** and **drop** functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name     |
|-----------------|
| Attribute Value |
| Abbreviation    |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button

- If the user wants to make this warehouse a **parent warehouse**
- Optional
- When checked, this warehouse will be a parent item group
- **Parent warehouse**
  - Searchable DDL
  - Link “warehouse” doctype
  - Single selection
  - Optional
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Warehouse Contacts info**
  - A table contain the following columns:
    - **Checkbox icon**
      - Multi selection
    - **No.**
      - Displays the ordering of items in the table
    - **Name**
      - Text input field
      - For entering the warehouse contact name
      - Mandatory.
      - Has a unique value.
      - Accepts letters, numbers, and special characters.
      - Minimum length: 2 characters.
      - Maximum length: 100 characters.
      - Once the maximum limit is reached, further input will be prevented.
      - An error message will appear if the entered text is less than the minimum length.
      - An error message will appear if an invalid item name is entered.
    - **Phone number**
      - It consists of the following:
        - **Country code**
          - DDL displaying the dialing code and country name for all countries.
          - When a country is selected, its dialing code is displayed next to the mobile number field.
        - **Phone number**
          - Text input field.
          - Mandatory.
          - Must be unique across the system.
          - If left empty, the following error message is displayed:  
**"This field is required. Please enter a mobile number."**
          - If an invalid mobile number is entered, the following error message is displayed:  
**"Invalid mobile number."**
          - Minimum length: 2 characters.

- A validation error message is displayed for each invalid field.

#### ■ Attachment

- Button
- To attach a file , link or image to the warehouse
- When clicked, a pop up appears containing the following:
  - **Upload file**
    - For adding a file, link or image to the warehouse
    - The user can upload a file or image using drag and drop or by clicking to browse files.
  - **(Upload) button**
    - When clicked, the file is successfully uploaded.
- Optional
- **Note:**
  - If attachments exist, they shall be displayed.
  - The system allows the user to download the attachments to their local device or delete them.

#### ■ Tags

- Button
- To add a tag to the warehouse for easier identification
- When clicked,
  - A text input field appears:
    - Text input field
    - For entering a new tag **or** search for an existing tag
    - Optional
    - Accepts letters, numbers, and special characters.
    - Minimum length: 2 characters.
    - Maximum length: 100 characters.
    - Once the maximum limit is reached, further input will be prevented.
    - If the entered text is less than the minimum length, an error message appears .
    - **Note:**
      - The field shall support searching for existing tags and entering new tags. The system shall display a drop-down list of available tags matching the entered text, and the user may either select a tag from the list or create a new tag if no suitable tag exists.
      - When a tag is selected or successfully created , it shall appear beside the **Tags Button** to indicate that it has been assigned to the item, with the option to remove it.

#### ■ Share

- Button
- To share this warehouse with other users
- When clicked, a pop up appears containing the following actions:

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

- **Print Format**
  - Searchable DDL
  - Link “**Print Format**” doctype
  - Single selection
  - Mandatory ,
  - If the field is left empty, an error message will appear.
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Page Size**
  - DDL
  - For selecting the page size
  - Contains the following values:
    - A0
    - A1
    - A2
    - A3
    - A4
    - A5
    - A6
    - A7
    - A8
    - A9
    - B0

- Button
- When clicked,
  - If all required data is entered correctly and completely:
    - The warehouse type is successfully added to the system
  - If incorrect or incomplete data is entered:
    - A validation error message is displayed for each invalid field.

- **Warehouse types List**

- **A table contain the following columns:**

- Checkbox icon
      - Multi selection
    - Warehouse type ID
      - It displays the warehouse ID (name)
      - Clickable
      - When clicked, a pop up appears containing the fields defined in the creation form to view or edit the warehouse type details, in addition to the following:
        - **Disable**
          - Checkbox
          - In case this warehouse type becomes inactive in the system
          - Optional
          - When checked,
            - If the warehouse type is already used in any existing warehouses:
              - A warning message is displayed to the user stating that “**this warehouse type can’t be disabled because it’s currently used in the following warehouse:** “ , followed by the list of those warehouse names.
            - If the warehouse type isn’t used in any warehouses:
              - The warehouse type is successfully disabled.
    - Status
      - Displays one of the following values:
        - Enabled
        - Disabled

- **Note:** when a warehouse type is selected , an action bar appears showing the following actions:
  - Edit
    - Button
    - When clicked , a popup appears containing the following fields.
      - **Field**
        - DDL

select from a predefined list of values.

- **Assign to user group**

- Searchable DDL
- Link “User Group” doctype
- Multi selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **(Add) Button**

- Button
- To save the assignment in the system
- When clicked,
  - If all required data is entered correctly and completely:
    - The assignment is successfully saved in the system
    - A notification is sent to the assigned user / user group
  - If incorrect or incomplete data is entered:
    - A validation error message is displayed for each invalid field.

- **Attachment**

- Button
- To attach a file , link or image to the UOM
- When clicked, a pop up appears containing the following:
  - **Upload file**
    - For adding a file, link or image to the warehouse
    - The user can upload a file or image using drag and drop or by clicking to browse files.
  - **(Upload) button**
    - When clicked, the file is successfully uploaded.
- Optional
- **Note:**
  - If attachments exist, they shall be displayed.
  - The system allows the user to download the attachments to their local device or delete them.

- **Tags**

- Button
- To add a tag to the UOM for easier identification
- When clicked,
  - A text input field appears:
    - Text input field
    - For entering a new tag or search for an existing tag
    - Optional
    - Accepts letters, numbers, and special characters.
    - Minimum length: 2 characters.

- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- If the entered text is less than the minimum length, an error message appears .
- **Note:**
  - The field shall support searching for existing tags and entering new tags. The system shall display a drop-down list of available tags matching the entered text, and the user may either select a tag from the list or create a new tag if no suitable tag exists.
  - When a tag is selected or successfully created , it shall appear beside the **Tags Button** to indicate that it has been assigned to the item, with the option to remove it.

■ **Share**

- Button
- To share this UOM with other users
- When clicked, a pop up appears containing the following actions:
  - **Search user**
    - Searchable DDL
    - Link “User” doctype
    - Single selection
    - Optional ,
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Permissions**
    - DDL
    - To share the UOM and assign permission to the user
    - Contains the following values:
      - Read only
      - Edit
      - Submit
      - Share
    - Multi selection
    - Mandatory , only when a user is selected
    - **Note:** the default value is **Read only**
  - **(Share) Button**
    - Button
    - To share the UOM with the selected user
    - When clicked,
      - If all required data is entered correctly and completely:

  - A validation error message is displayed for each invalid field.

#### ■ Print

- Button
- To print the UOM details
- When clicked, a pop up appears containing the following values:
  - **Letter Head**
    - Searchable DDL
    - Link “Letter Head” doctype
    - Single selection
    - Mandatory ,
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Print Format**
    - Searchable DDL
    - Link “Print Format” doctype
    - Single selection
    - Mandatory ,
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Page Size**
    - DDL
    - For selecting the page size
    - Contains the following values:
      - A0
      - A1
      - A2
      - A3
      - A4
      - A5
      - A6
      - A7
      - A8
      - A9
      - B0
      - B1
      - B2
      - B3

- B4
- B5
- B6
- B7
- B8
- B9
- B10
- C5E
- Comm10E
- DLE
- Executive
- Folio
- Ledger
- Legal
- Letter
- Tabloid
- Custom

- **Note:** the default value is **A4**
- Single selection
- Mandatory
- If the field is left empty, an error message will appear.

○ **Language**

- Searchable DDL
- Link “**Language**” doctype
- Single selection
- Mandatory ,
- If the field is left empty, an error message will appear.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

○ **(Print) Button**

- Button
- To print the UOM details
- When clicked,
  - If all required data is entered correctly and completely:
    - The warehouse is printed successfully.
  - If incorrect or incomplete data is entered:
    - A validation error message is displayed for each invalid field.

■ **(Delete) Button**

- Button
- To permanently delete this UOM
- When clicked, a confirmation message appears with options:

predefined list of values.

- **Value**

- Text input field
- For entering the conversion factor value.
- Mandatory.
- Accepts integers and decimal numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- An error message will appear if the entered text is less than the minimum length.
- An error message will appear if an invalid value is entered.
- If the field is left empty, an error message will appear.

- **UOM Conversion Factors List**

- **A table contain the following columns:**

- Checkbox icon

- Multi selection

- ID

- It displays the UOM conversion factor ID (naming series)
- Clickable
- When clicked, a pop up appears containing the fields defined in the creation form to **view** or **edit** the conversion factor details

- Category

- Displays the conversion factor category:

- From

- Displays the UOM to convert **from**

- To

- Displays the UOM to convert **to**

- Value

- Displays the conversion factor value

- **Note:**

- when a UOM conversion factor is selected , an action bar appears showing the following actions:

- Edit

- Button

- When clicked , a popup appears containing the following fields.

- **Field**

- DDL
- To select the field you want to edit
- Link “UOM Conversion Factor” doctype
- Single selection
- Mandatory

- **Value**

- Dynamic field
- Based on the selected option from the first dropdown field, the second field shall :
  - Dynamically change it's input type

- ID
    - It displays the UOM Category ID
    - Clickable
    - When clicked, a pop up appears containing the fields defined in the creation form to **view** or **edit** the UOM Category details
  - Category name
    - Displays the UOM Category name:
- **Note:**
  - when a UOM Category is selected , an action bar appears showing the following actions:
  - Edit
    - Button
    - When clicked , a popup appears containing the following fields.
      - **Field**
        - DDL
        - To select the field you want to edit
        - Link “UOM Category” doctype
        - Single selection
        - Mandatory
      - **Value**
        - Dynamic field
        - Based on the selected option from the first dropdown field, the second field shall :
          - Dynamically change it’s input type
          - Be marked as either mandatory
          - Or optional
          - Apply the corresponding validation rules
  - Export
  - Assign to
  - Clear assignment
  - Add tags
  - Print
  - Delete
    - When clicked,
      - A confirmation message is displayed to the user whether they want to delete this UOM Category
      - Upon clicking the “Yes” button:
        - if the UOM Category is linked to other transactions,
          - a message is displayed informing the user that the linked transactions must be deleted before the UOM Category can be deleted.
          - The warning message displays the linked doctypes as hyperlinks; they are redirected to the corresponding doctype.
        - If the UOM Category isn’t linked to another doctype
          - The UOM Category is deleted successfully.

- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Notes**

- Text area
- For adding notes related to the manufacturer.
- Optional
- Accepts letters, numbers, and special characters.
- Minimum length: 2 characters.
- Maximum length: 500 characters.
- Once the maximum limit is reached, further input will be prevented.
- An error message will appear if the entered text is less than the minimum length.
- An error message will appear if invalid data is entered.

- **Manufacturer Contact info**

- A table contain the following columns:

- **Checkbox icon**

- Multi selection

- **No.**

- Displays the ordering of items in the table

- **Name**

- Text input field
    - For entering the manufacturer contact name
    - Mandatory.
    - Has a unique value.
    - Accepts letters, numbers, and special characters.
    - Minimum length: 2 characters.
    - Maximum length: 100 characters.
    - Once the maximum limit is reached, further input will be prevented.
    - An error message will appear if the entered text is less than the minimum length.
    - An error message will appear if an invalid item name is entered.

- **Phone number**

- It consists of the following:

- **Country code**

- DDL displaying the dialing code and country name for all countries.
      - When a country is selected, its dialing code is displayed next to the mobile number field.

- **Phone number**

- Text input field.
      - Mandatory.
      - Must be unique across the system.
      - If left empty, the following error message is displayed:  
**"This field is required. Please enter a mobile number."**
      - If an invalid mobile number is entered, the following error message is displayed:

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

- Button
- For adding or removing columns from the table
- When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
- These columns are:

| Column Name        |
|--------------------|
| Name               |
| Phone Number       |
| Is Primary         |
| Contact Type       |
| Email Address      |
| Email Address Type |
| Job Title          |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when a Manufacturer is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected manufacturer(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the following fields:

- For entering the address of the manufacturer
- Mandatory.
- Accepts letters, numbers, and special characters.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- An error message will appear if the entered text is less than the minimum length.
- An error message will appear if an invalid manufacturer name is entered.

■ **Address type**

- DDL
- For selecting the address type
- It contains the following:
  - Default
  - Home
  - Postal
  - Office
  - Billing
  - Shipping
- Single selection
- Optional

■ **Is primary**

- Checkbox
- In case this address is primary
- Optional

■ **Setting**

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using **drag** and **drop** functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name  |
|--------------|
| Address      |
| Address type |
| Is Primary   |
| Country      |
| Governorate  |
| City         |
| Postal code  |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:**
  - when a row is selected , an action bar appears showing the following actions:
    - Is primary
      - Checkbox
      - To set this addresses a primary address
      - Optional
      -
    - Delete row
      - Button
      - To delete a specific row or multiple rows
      - When clicked, the selected item group(s) will be deleted
  - when multiple rows are selected ,the “**is primary**” checkbox is hidden
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.

- When clicked , a pop up appears containing the following fields:

| Field Name   | Options                                                                                                                                                                                                                                                                                                                                                                                                                              |

- It displays the current quantity of the batch.
- **Note:** the batch quantity is not entered manually, it is generated systemically through the following process:
  - When a **Purchase Receipt** is submitted and the received quantity is confirmed, a **Stock Entry** is automatically created for the received item. If the item has “Has Batch No” enabled, the system either:
    - Automatically creates a new batch and assigns the received quantity to it, or
    - Allows the user to select an existing batch number to which the received quantity will be added.

- **Status**

- Label field
- Displays one of the following values:
  - Active
  - Disabled
  - Empty
  - Expired

- **Disable**

- Checkbox
- In case this batch becomes inactive in the system
- Optional
- **Note:**
  - When checked,
    - It won't affect any existing records or transactions, but the user won't be able to perform any future transactions on this batch.

- **Fixed Page Actions**

- The following action buttons are fixed and consistently displayed at the top of all (batch details) pages to provide a quick access to common functions:
  - **Move**
    - Button
    - To move the batch quantity from this warehouse to another warehouse
    - When clicked, a pop up appears containing the following fields
      - **To Warehouse**
        - Searchable DDL
        - Link “**warehouse**” doctype
        - **Note:** It displays only **child warehouses**
        - Single selection
        - Mandatory
        - If the field is left empty an error message appears.
        - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
      - **Move**
        - Button
        - When clicked
          - If all required data is entered correctly and

completely:

- This batch is successfully moved to the selected warehouse
- A “material transfer” stock entry is created.
- If incorrect or incomplete data is entered:
  - A validation error message is displayed for each invalid field.

#### ■ Split

- Button
- To split the batch quantity across two warehouses.
- When clicked, a pop up appears containing the following fields
  - **New Batch Quantity**
    - Text input field
    - For entering the new batch quantity
    - Mandatory.
    - **Note:** The new batch quantity can't exceed the original batch quantity
    - Accepts numbers only.
    - Minimum length: 2 characters.
    - Maximum length: 100 characters.
    - Once the maximum limit is reached, further input will be prevented.
    - An error message will appear if the entered text is less than the minimum length.
    - An error message will appear if an invalid Batch quantity is entered.
  - **New Batch ID**
    - Text input field
    - For entering the new Batch ID
    - optional.
    - Has a unique value.
    - Accepts letters, numbers, and special characters.
    - Minimum length: 2 characters.
    - Maximum length: 100 characters.
    - Once the maximum limit is reached, further input will be prevented.
    - An error message will appear if the entered text is less than the minimum length.
    - If the field is left empty, **the system will automatically generate a batch ID.**
  - **Split**
    - Button
    - When clicked
      - If all required data is entered correctly and completely:
        - This batch is successfully split.

numbers, even if “**Allow Negative Stock**” is enabled in Stock Settings.

- Serial No creation is only allowed for items when:
  - Maintain Stock is enabled
  - Has Serial No is enabled
- When a Serial Number Series is defined for an item, the system automatically generates serial numbers for the related batch based on the configured series. However, if the user manually enters a serial number, the system will use the value provided by the user instead.
- The Serial Number Series is intended to define the format used only when serial numbers are system-generated. If the user chooses to enter serial numbers manually, the system will accept the input without validation errors and will not enforce the configured series.

- **Add Serial No**

- Button
- For adding a new Serial No
- When clicked, the user will be redirected to the “[Add Serial No](#)” screen.

- **Serial Numbers List**

- **A table contain the following columns:**

- Checkbox icon
  - Multi selection
- Serial No ID
  - It displays the Serial No
  - Clickable
  - When clicked, the user is navigated to the “[Serial No Details](#)” screen
- Status
  - Displays one of the following values:
    - Active
    - Inactive
      - The status becomes Inactive when a Stock Reconciliation is performed for this serial number.
    - Consumed
      - The status becomes Consumed when a Stock Entry of type **Material Issue** is created using this serial number.
    - Delivered
      - The status becomes Delivered when a **Delivery Note** or **Sales Invoice** is created using this serial number, with the “**Update Stock**” option enabled.
    - Expired
      - The status becomes Expired when the batch linked to this serial number is **Expired**.
    - Disabled
- Item code
  - It displays the item code associated with the serial no
- Warehouse
  - Displays the warehouse where the item will be stored

- Checkbox icon (read-only)
- Displays whether this item has serial no or not
- **Note:** it's fetched from the selected item
- **Has Batch No**
  - Checkbox icon (read-only)
  - Displays whether this item has batch no or not
  - **Note:** it's fetched from the selected item
- **Serial and Batch No**
  - A table contain the following columns:
    - **Checkbox icon**
      - Icon
    - **No.**
      - Displays the ordering of items in the table
    - **Serial No**
      - Label field
      - Displays the serial number of the item unit.
    - **Batch No**
      - Label field
      - Displays the batch number associated with the item unit.
    - **Qty**
      - Label field
      - Displays the quantity of units for this item.
    - **Warehouse**
      - Label field
      - Displays the warehouse involved in the stock transaction
      - **It's hidden by default**
- **Qty and Rate**
  - **Total quantity**
    - Label field
    - Displays the total quantity of this item
  - **Avg Rate**
    - Label field
    - Displays the average rate for the total quantity of this item
    - It's calculated based on the following formula :
      - Average rate = total unit price / total quantity
  - **Total Amount**
    - Label field
    - Displays the total amount of the units for this item
    - It's calculated based on the following formula :
      - Total amount = total quantity \* avg rate
- **Reference**
  - **Voucher type**
    - Label field
    - It displays the type of transaction associated with the record.

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

- Displays only child warehouses where the “Is Group warehouse” option is disabled.
- **Note:** it appears only when the purpose is “[Purchase](#)”
- Single selection
- Optional
- **Note:**
  - This field is completely hidden after submitting.
  - the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

■ **Set Source Warehouse**

- The user can select a default warehouse to automatically populate the Warehouse field for all items in the item table, but only for rows where the Warehouse field is empty. Existing warehouse values will not be overwritten.
- Searchable DDL
- Link “Warehouse” doctype
- Displays only child warehouses where the “Is Group warehouse” option is disabled.
- **Note:** it appears only when the purpose is “[Material Transfer](#)”
- Single selection
- Optional

■ **Set Target Warehouse**

- The user can select a default warehouse to automatically populate the Warehouse field for all items in the item table, but only for rows where the Warehouse field is empty. Existing warehouse values will not be overwritten.
- Searchable DDL
- Link “Warehouse” doctype
- Displays only child warehouses where the “Is Group warehouse” option is disabled.
- **Note:** it appears only when the purpose is “[Material Transfer](#)”
- Single selection
- Optional

■ **Set From Warehouse**

- The user can select a default warehouse to automatically populate the Warehouse field for all items in the item table, but only for rows where the Warehouse field is empty. Existing warehouse values will not be overwritten.
- Searchable DDL
- Link “Warehouse” doctype
- Displays only child warehouses where the “Is Group warehouse” option is disabled.
- **Note:** it appears only when the purpose is “[Material Issue](#)”
- Single selection
- Optional

■ **Items**

- A table contain the following columns:
  - **Checkbox icon**
    - Multi selection
  - **No.**
    - Displays the ordering of items in the table
  - **Item**
    - Searchable DDL
    - Link “Item” doctype
    - Single selection
    - Mandatory
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Required by**
    - Date calendar picker
    - To select the required-by date for receiving this item
    - Mandatory
    - If the field is left empty, an error message will appear.
    - **Note:** the required by date can’t be earlier than the current date
  - **Quantity**
    - Text input field
    - For entering the required quantity for this item.
    - Mandatory.
    - Accepts numbers only.
    - Minimum length: 2 characters.
    - Maximum length: 100 characters.
    - Once the maximum limit is reached, further input will be prevented.
    - An error message will appear if the entered text is less than the minimum length.
    - If the field is left empty an error message appears.
  - **Warehouse**
    - The user can specify the target warehouse for each item individually.
    - **Note:** The entered value takes priority and is not affected by the value selected in the Set Warehouse field.
    - Searchable DDL
    - Link “Warehouse” doctype
    - **Note:** it appears only when the purpose is “Purchase”
    - Single selection
    - Mandatory,

○ **Setting**

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name           |
|-----------------------|
| Item Code             |
| Required By           |
| Quantity              |
| Warehouse             |
| UOM                   |
| Item Name             |
| Description           |
| Item Group            |
| Brand                 |
| Image                 |
| Stock UOM             |
| Source Warehouse      |
| UOM Conversion Factor |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

or any part of it.

- **Sales order list**

- It contains only sales orders whose status is not equal to “**Hold**” or “**Closed**”
- A table contain the following columns:
  - **Checkbox icon**
    - Multi selection
  - **No.**
    - Displays the ordering of items in the table
  - **Name**
    - Label field
    - It displays the sales order name
    - Clickable
    - When clicked, it navigates the user to “sales order details” screen
  - **Customer (read-only)**
    - Label field
    - It displays the customer name
  - **Delivery Date (read-only)**
    - Label field
    - It displays the delivery date

- **Get Items**

- Button
- When a sales order(s) is selected and the user clicks the “Get Items” button, the sales order items are successfully fetched and indeed to the items table.

- **Product Bundle**

- Button
- When clicked, a pop up appears containing the following fields:
  - **Product Bundle**
    - Searchable DDL
    - Link “**Product Bundle**” doctype
    - Single selection
    - Mandatory
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Quantity**
    - Text input field
    - For entering the required quantity for this bundle.
    - Mandatory.

- **More Info Tab**

- The system retrieves and displays the data entered during creation in more info tab in addition to the following:

- **Status**

- Label field
    - Displays the material request status
    - It displays one of the following:
      - Draft
      - Submitted
      - Pending
      - Partially ordered
      - Ordered
      - Issued
      - Transferred
      - Received
      - Stopped
      - Cancelled

- **% Ordered**

- Label field
    - Displays the percentage of the material request that has been ordered.

- **Connections Tab**

- It contains the following values:

- **Reference**

- **Sales Order**
      - Button
      - Link “Sales Order” docktype
    - **Request for Quotation**
      - Button
      - Link “Request for Quotation” docktype
    - **Supplier Quotation**
      - Button
      - Link “Supplier Quotation” docktype
    - **Purchase Order**
      - Button
      - Link “Purchase Order” docktype

- **Stock**

- **Stock Entry**

  - When clicked, a pop up appears contains the following options :
    - Rearranging table columns using **drag** and **drop** functionality.
      - Users can click and hold a column header , then drag and drop it into the desired position within the table.
    - Column width
      - Text input field
      - For entering or edit the column width

- Accepts numbers only
- Minimum length: 1 character.
- Maximum length: 3 characters.
- Default value = 3

■ Add / Remove columns

- Button
- For adding or removing columns from the table
- When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
- These columns are:

| Column Name       |
|-------------------|
| Customer          |
| Address Name      |
| Locked            |
| Delivery Note     |
| Estimated Arrival |
| Customer Address  |
| Visited           |
| Grand Total       |
| Contact Name      |
| Email sent to     |
| Customer Contact  |
| Distance          |
| UOM               |
| Details           |

- Users can show or hide columns by selecting or deselecting the related checkbox.

■ “Update” button

- Button
- For save any changes or updates made by the user
- When clicked, any modifications made by the user will be saved

- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when a row is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected row(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the following fields:

| Field Name   | Options                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

■ Add Row

- Button
- To add a new row in the table
- When clicked, a new row is added to the table.

● Calculate Estimated Arrival Times

- Button
- When clicked, it calculates the Estimated Time of Arrival (ETA) for each delivery stop in the delivery trip based on the trip route using Google Maps Directions API.
- **How it works:**

- The system sends the delivery stop locations to the Google Maps Directions API.
  - The travel time between each consecutive stop is calculated.
  - The **Estimated Arrival** field is automatically populated for each delivery stop.
- **Optimize Route**
  - Button
  - It optimizes the delivery route by automatically reordering unlocked delivery stops to achieve the most efficient route in terms of travel time or distance using Google Maps Directions API.
  - **How it works:**
    - The system sends all delivery stop locations to the Google Maps Directions API.
    - The delivery stops are automatically reordered to determine the fastest or shortest route.
    - The order of the **Delivery Stops** is updated accordingly.
    - After the route is optimized, the user can click **Calculate Estimated Arrival Times** to recalculate the estimated arrival times based on the new route.
  - **Note:** Delivery stops marked as Locked will retain their current position and will not be moved during route optimization.
- **Status**
  - Label field (read only)
  - It displays the delivery trip status
  - It displays one of the following values:
    - Draft
    - Scheduled
    - In Transit
    - Completed
    - Cancelled
- **Amended From**
  - Label field
  - Displays the Delivery Trip from which this document was amended.
  - Clickable
  - When clicked, it navigates the user to the Delivery Trip from which this document was amended.
  - **Note:** This field is displayed only if this Delivery Trip is amended from another Delivery Trip
- **Fixed Page Actions**
  - It contains the following:
    - **View**
      - DDL
      - It contains the following fields:
      - **Delivery Note**
        - Button
        - When clicked, the system navigates the user to the “Delivery Note List” screen.
    - **Get Stops From**

- DDL
- It contains the following fields:
- **Delivery Note**
  - Button
  - When clicked, a pop up appears containing the following fields:
    - **Search**
      - The user can search by the following:
        - **Name**
          - Text input field
          - Users can search by the Delivery Note name or any part of it.
          - Max length : 100 characters
          - Once the maximum limit is reached, further input will be prevented.
        - **Company**
          - Searchable DDL
          - Link “**Company**” doctype
          - Single selection
          - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
        - **Customer**
          - Searchable DDL
          - Link “**Customer**” doctype
          - Single selection
          - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Delivery Note list**
      - A table contain the following columns:
        - **Checkbox icon**
          - Multi selection
        - **No.**
          - Displays the ordering of items in the table
        - **Name**
          - Label field
          - It displays the Delivery Note name
          - Clickable
          - When clicked, it navigates the user to “Delivery Note

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

- Multi selection
- **No.**
  - Displays the ordering of items in the table
- **Item**
  - Searchable DDL
  - Link “**Item**” doctype
  - Single selection
  - Mandatory
  - If the field is left empty an error message appears.
  - **Note:** only child items with **Has Variants** disabled are displayed.
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Qty**
  - Text input field.
  - To enter the Qty of the item
  - Mandatory
  - Accepts numbers only.
  - Maximum length: 100 characters.
  - Once the maximum length is reached, further input is prevented.
- **Description**
  - Text input field
  - For adding a description to this Product Bundle
  - Optional
  - Accepts letters, numbers, and special characters.
  - Minimum length: 2 characters.
  - Maximum length: 100 characters.
  - Once the maximum limit is reached, further input will be prevented.
  - An error message will appear if the entered text is less than the minimum length.
  - An error message will appear if invalid data is entered.

table.

- Column width
  - Text input field
  - For entering or edit the column width
  - Accepts numbers only
  - Minimum length: 1 character.
  - Maximum length: 3 characters.
  - Default value = 3
- Add / Remove columns
  - Button
  - For adding or removing columns from the table
  - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
  - These columns are:

| Column Name |
|-------------|
| Country     |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an Item is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected row(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the previously mentioned fields:

| Field Name | Options |
|------------|---------|
|------------|---------|

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

utilized from the reserved stock.

#### ■ **Serial and Batch Reservation**

- It contains the following fields:

- **Reservation Based On**

- Label field (read only)
- Displays the reservation method used to reserve stock for the item.
- It displays one of the following values:
  - Qty
    - This indicates that the reservation is based on the Qty of the item
  - Serial and Batch
    - This indicates that the reservation is based on specific Serial Numbers and Batch Numbers.

- **Serial and Batch Table (read only)**

- **A table contain the following columns:**

- **Checkbox icon**
  - Multi selection
- **No.**
  - Displays the ordering of items in the table
- **Serial No**
  - Label field (read only)
  - Displays the Serial Number reserved for the item as part of the stock reservation
- **Batch No**
  - Label field (read only)
  - Displays the Batch Number associated with the reserved item
- **Qty**
  - Label field (read only)
  - Displays the quantity reserved against the specified Serial Number and/or Batch Number
- **Warehouse**
  - Label field (read only)
  - Displays the warehouse from which the Serial Number or Batch Number has been reserved
- **Setting**
  - When clicked, a pop up appears contains the following options :
    - Rearranging table columns using drag and drop functionality.

- Users can click and hold a column header , then drag and drop it into the desired position within the table.
- Column width
  - Text input field
  - For entering or edit the column width
  - Accepts numbers only
  - Minimum length: 1 character.
  - Maximum length: 3 characters.
  - Default value = 3
- Add / Remove columns
  - Button
  - For adding or removing columns from the table
  - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
  - These columns are:

| Column Name         |
|---------------------|
| Serial No           |
| Batch No            |
| Qty                 |
| Warehouse           |
| Item Code           |
| Delivered Qty       |
| Voucher Type        |
| Voucher No          |
| Is Cancelled        |
| Posting Datetime    |
| Type of Transaction |
| Voucher Detail No   |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- **“Update”** button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- **“Reset to default”** button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
  - **Note:** when a row is selected , an action bar appears showing the following actions:
- **Note:** users cannot delete a row
- **Edit Row**
  - Clickable icon
  - Users can view only non displayed fields in the table.
  - When clicked , a pop up appears containing the following fields:

| Field Name | Options                                                                                                                                                                  |

| <b>Components</b>     | <ul style="list-style-type: none"> <li>• <b>Delivery Note</b> <ul style="list-style-type: none"> <li>○ Searchable DDL</li> <li>○ Displays only Delivery Notes with a status “<b>Draft</b>”</li> <li>○ <u>Link “<b>Delivery Note</b>” doctype</u></li> <li>○ Single selection</li> <li>○ Mandatory</li> <li>○ If the field is left empty, an error message will appear.</li> <li>○ <b>Note:</b> the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.</li> </ul> </li> </ul> |

- **Series**
  - DDL
  - Displays all Naming Series that have been configured or previously used in the system
  - Single selection
  - Mandatory
  - If the field is left empty, an error message will appear.
- **Packing Slip ID / Number**
  - Text input field.
  - To enter the packing slip number
  - Optional
  - **Note:** If a Packing Slip Number is entered, it takes precedence and is displayed in transactions instead of the series. If no Packing Slip Number is entered, the system uses the series defined for that Packing Slip.
  - Accept letters, numbers and special characters.
  - Maximum length: 100 characters.
  - Once the maximum length is reached, further input is prevented.
- **Items**
  - A table contain the following columns:
    - **Checkbox icon**
      - Multi selection
    - **No.**
      - Displays the ordering of items in the table
    - **Item Code**
      - Searchable DDL
      - Link “item” doctype
      - Only items included in the selected [Delivery Note](#) are displayed.
      - Single selection
      - Mandatory
      - If the field is left empty, an error message will appear.
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Item Name**
      - Label field (read only)
      - It displays the item name based on the selected item code
    - **Qty**
      - Text input field.
      - To enter the Qty of the item
      - **Note:** the item Qty is fetched from the selected Delivery Note
      - Mandatory.
      - Accept numbers only.
      - Maximum length: 100 characters.
      - Once the maximum length is reached, further input is prevented.
      - If the field is left empty an error message appears.
    - **Net Weight**
      - Text input field.

- To enter the net weight of the item
- **Note:** the item net weight is fetched from the **Item Weight Per Unit**
- Optional.
- Accept numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.

#### ■ Setting

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using **drag** and **drop** functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name |
|-------------|
| Item Code   |
| Item Name   |
| Quantity    |
| Net Weight  |
| Page Break  |
| Batch No    |
| Description |
| UOM         |
| Weight UOM  |

- Users can show or hide columns by selecting or

- deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an row is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item group(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the following fields:

| Field Name | Options                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

■ **Contact preview**

- Label field (read only)
- Displays the complete details of the selected contact.
- It displays the following data based on the selected [Contact](#)
  - Full Name
  - Email

• **“Delivery To” Info**

- It contains the following fields:
  - It contains the following fields:
    - **Delivery To**
      - DDL
      - Specifies the destination party to which the shipment will be delivered.
      - It contains the following values:
        - Company
        - Customer
        - Supplier
      - Single selection
      - It has a default value “Company”

- **Company**
  - Searchable DDL
  - To select the company receiving the shipment
  - Link “**Company**” doctype
  - It appears only when the Delivery To is set to “[Company](#)”
  - Single selection
  - Mandatory
  - If the field is left empty, an error message will appear.
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Customer**
  - Searchable DDL
  - To select the customer receiving the shipment
  - Link “**Customer**” doctype
  - It appears only when the Delivery To is set to “[Customer](#)”
  - Single selection
  - Mandatory
  - If the field is left empty, an error message will appear.
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Supplier**
  - Searchable DDL
  - To select the supplier receiving the shipment
  - Link “**Supplier**” doctype
  - It appears only when the Delivery To is set to “[Supplier](#)”
  - Single selection
  - Mandatory
  - If the field is left empty, an error message will appear.
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Delivery Address**
  - Searchable DDL
  - To select the destination address where the shipment will be delivered.

- Single selection
  - Mandatory
  - If the field is left empty, an error message will appear.
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Delivery Address preview**
  - Label field (read only)
  - Displays the complete details of the selected delivery address.
  - It displays the following data based on the selected [Delivery Address](#)
    - Address Line 1
    - City / Town
    - Country
- **Delivery Contact**
  - Searchable DDL
  - To select the contact person responsible for receiving the shipment at the destination.
  - Link **“Contact”** doctype
  - It appears only when the Pic kup From is set to **“Company”** or **“Customer”** or **“Supplier”**
  - It displays the contacts based on the selected Customer or Supplier
  - Single selection
  - Mandatory
  - If the field is left empty, an error message will appear.
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Delivery Contact preview**
  - Label field (read only)
  - Displays the complete details of the selected delivery contact.
  - It displays the following data based on the selected [Delivery Contact](#)
    - Full Name
    - Email
- **Parcels**
  - A table contain the following columns:
    - **Checkbox icon**
      - Multi selection
    - **No.**
      - Displays the ordering of items in the table
    - **Parcel ID / Number**
      - Text input field.
      - To enter the parcel ID / number

- mandatory.
- Accept integers and decimal numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- If the field is left empty an error message appears.

■ **Length (cm)**

- Text input field.
- To enter the parcel length
- optional.
- Accept integers and decimal numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.

■ **Width (cm)**

- Text input field.
- To enter the parcel width
- optional.
- Accept integers and decimal numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.

■ **Height (cm)**

- Text input field.
- To enter the parcel height
- optional.
- Accept integers and decimal numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.

■ **Weight (KG)**

- Text input field.
- To enter the parcel weight
- **Mandatory**
- Accept integers and decimal numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- If the field is left empty an error message appears.

■ **Setting**

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using **drag** and **drop** functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.

- Default value = 3
- Add / Remove columns
  - Button
  - For adding or removing columns from the table
  - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
  - These columns are:

| Column Name |
|-------------|
| ID / Number |
| Length (cm) |
| Width (cm)  |
| Height (cm) |
| Weight (Kg) |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an row is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item group(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the following fields:

| Field Name | Options |
|------------|---------|
|------------|---------|

|  |  |                    |                                                                                                                                                                                                                                                                                                                                                                        |

the Packing Slip field supports only a single selection and cannot contain multiple values.

- Single selection
- Mandatory
- If the field is left empty, an error message will appear.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

#### ■ Qty

- Label field (read only)
- It displays the Qty of each packing slip
- **Note:** When a **Delivery Note** is selected, the system automatically fetches the Qty of each packing slip and populates it in the Qty column of the corresponding table row.

#### ■ Gross Weight

- Text input field.
- To enter the Packing Slip Gross weight
- Mandatory.
- Accept integers and decimal numbers only.
- **Note:** When a **Delivery Note** is selected, the system automatically fetches the Gross Weight of each packing slip and populates it in the Gross weight column of the corresponding table row.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- If the field is left empty an error message appears.

#### ■ Parcel ID / Number

- Text input field.
- To enter the parcel ID / Number
- Mandatory
- Accept integers and decimal numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- If the field is left empty an error message appears.

#### ■ Setting

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using **drag** and **drop** functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3

- Add / Remove columns
  - Button
  - For adding or removing columns from the table
  - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
  - These columns are:

| Column Name        |
|--------------------|
| Delivery Note      |
| Packing Slip       |
| Qty                |
| Gross Weight       |
| Parcel ID / Number |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an row is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item group(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the following fields:

| Field Name    | Options                                                            |
|---------------|--------------------------------------------------------------------|

- **Add Row**
  - Button
  - To add a new row in the table
  - When clicked, a new row is added to the table.
- **Packing Slips Total Weight (Kg)**
  - Label field (read only)
  - Displays the total weight of the Packing Slips in Kg
  - **Note:** The Total Weight is calculated as the sum of the Packing Slip Weight (Shipment Weight UOM) values of all selected Packing Slips.
- **Note:** [Shipment Total Weight \(Kg\)](#) must be greater or equal than [Packing Slips Total Weight \(Kg\)](#)
- **Shipment Details**
  - It contains the following fields:
    - **Pallets**
      - DDL
      - Indicates whether the shipment is packed on pallets.

- It contains the following values:
  - Yes
  - No
- Single selection
- Optional
- **Shipment Type**
  - DDL
  - Specifies the type of shipment being transported.
  - It contains the following values:
    - Goods
    - Documents
  - Single selection
  - Optional
- **Value of Goods**
  - Text input field
  - Specifies the total declared value of the shipped goods.
  - Mandatory .
  - Accept integers and decimal numbers only.
  - Maximum length: 100 characters.
  - Once the maximum length is reached, further input is prevented.
  - If the field is left empty an error message appears.
- **Pickup Type**
  - DDL
  - Specifies how the shipment will be handed over to the carrier.
  - It contains the following values:
    - Pickup
    - Self Delivery
  - Single selection
  - Optional
- **Pickup Date**
  - Date calendar picker
  - To select the scheduled pickup date for the shipment.
  - Mandatory
  - Default value = current date
  - If the field is left empty an error message appears.
- **Incoterm**
  - Searchable DDL
  - Link “Incoterm” doctype
  - Specifies the Incoterm governing the shipment and delivery responsibilities.
  - Single selection
  - Optional
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Pickup From**

- Link “**Company**” doctype
- Single selection
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

■ **Customer**

- Searchable DDL
- Link “**Customer**” doctype
- Single selection
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

○ **Delivery Note list**

■ A table contain the following columns:

- **Checkbox icon**
  - Multi selection
- **No.**
  - Displays the ordering of items in the table
- **Name**
  - Label field
  - It displays the Delivery Note name
  - Clickable
  - When clicked, it navigates the user to “Delivery Note Details” screen
- **Company**
  - Label field
  - It displays the company name
- **Customer**
  - Label field
  - It displays the customer name

- **Note:** only **Submitted** Delivery Notes are displayed in the table.

○ **Get Items**

- Button
- When a Delivery Note(s) is selected and the user clicks the “**Get Items**” button, the Delivery Notes are successfully fetched and indeed to the [Shipment Delivery Note & Packing Slips](#) table.

■ **Save**

- Button
- When clicked,
  - If all required data is entered correctly and completely:
    - The Shipment is successfully saved and not submitted.

- Clickable
- When clicked, it navigates the user to the delivery note from which this document was amended.
- **Note:** This field is displayed only if this delivery note is amended from another delivery note

- **Is Return**

- Checkbox icon (read only)
- It appears only when a **sales return** has been created for this delivery note. In this case, the checkbox appears as checked.

- **Issue Credit Note**

- Checkbox
- When checked, the system creates a **Sales Invoice** and its status set to **Credit Note**, indicating that the customer has a credit balance.
- **Note:** This field appears only when the user clicks on create **sales return**

- **Return Against Delivery Note**

- Label field (read only)
- It displays the original Delivery Note from which the sales return was created
- Clickable
- When clicked, it navigates the user to the delivery note from which this sales return was created.
- **Note:** This field appears only when the user clicks on create **sales return**

- **Currency and Price List**

- It contains the following fields:

- **Currency**

- Searchable DDL
    - Link “**Currency**” doctype
    - To select the document currency
    - Single selection
    - Mandatory
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Note:** it's fetched from the Company “**Default Currency**”

- **Exchange Rate**

- The behavior of the **Exchange Rate** field depends on the Exchange Rate configuration in **Accounts Settings**

- **Case 1:**

- **Exchange Rate Fetching Rule is configured**

- If an **Exchange Rate Fetching Rule** is defined in Accounts Settings, the system shall automatically fetch the exchange rate based on the configured rule and populate the **Exchange Rate** field.

- In this case **Exchange Rate** field is Label Field (**read only**)

- **Note:**

- only users with the appropriate Role to edit the Exchange Rate(**Configured in Accounts Settings**) shall be allowed to modify its value
- Any manually entered Exchange Rate by an authorized user shall **override** the automatically fetched Exchange Rate and shall be considered the effective value for the transaction.

- **Case 2:**

- **No Exchange Rate Found**

- If no exchange rate is found based on the configured fetching rule, the system shall evaluate the **Action if No Exchange Rate Found** field in Accounts Settings.

- **Prompt User to Add Exchange Rate:**

- The system shall prompt the user to create a new Exchange Rate record before proceeding.
      - Once the Exchange Rate is created, the system shall populate the Exchange Rate field.
      - The Exchange Rate field shall remain **read-only**
      - **Note:**

- only users with the appropriate Role to edit the Exchange Rate(**Configured in Accounts Settings**) shall be allowed to modify its value
        - Any manually entered Exchange Rate by an authorized user shall **override** the automatically fetched Exchange Rate and shall be considered the effective value for the transaction.

- **Use API to Get Exchange Rate**

- The system shall automatically create and retrieve the Exchange Rate using the configured external API.
      - After the Exchange Rate is successfully created, the system shall populate the Exchange Rate field.
      - The Exchange Rate field shall remain **read-only**.
      - **Note:**

- only users with the

appropriate Role to edit the Exchange Rate(**Configured in Accounts Settings**) shall be allowed to modify its value

- Any manually entered Exchange Rate by an authorized user shall **override** the automatically fetched Exchange Rate and shall be considered the effective value for the transaction.

#### ■ Price List

- Searchable DDL
- Link **"Price List"** doctype
- Single selection
- Mandatory
- If the field is left empty, an error message will appear.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- Note: it's set by default as **"Standard Price List"** in **selling settings**

#### ■ Price List Currency

- Label field (read only)
- Fetched from Price list's **"Currency"** field

#### ■ Price List Exchange Rate

- The behavior of the **Price List Exchange Rate** field depends on the Exchange Rate configuration in **Accounts Settings**
- **Case 1:**
  - **Exchange Rate Fetching Rule is configured**
    - **Exchange Rate Fetching Rule** is defined in Accounts Settings, the system shall automatically fetch the exchange rate based on the configured rule and populate the **Exchange Rate** field.
    - In this case **Exchange Rate** field is Label Field (**read only**)
    - **Note:**
      - only users with the appropriate Role to edit the Exchange Rate(**Configured in Accounts Settings**) shall be allowed to modify its value
      - Any manually entered Exchange Rate by an authorized user shall **override** the automatically fetched Exchange Rate and shall be considered the effective value for the transaction.
  - **No Exchange Rate Found**
    - If no exchange rate is found based on the
- **Case 2:**

configured fetching rule, the system shall evaluate the **Action if No Exchange Rate Found** field in Accounts Settings.

- **Prompt User to Add Exchange Rate:**

- The system shall prompt the user to create a new Exchange Rate record before proceeding.
- Once the Exchange Rate is created, the system shall populate the Exchange Rate field.
- The Exchange Rate field shall remain **read-only**
- **Note:**
  - only users with the appropriate Role to edit the Exchange Rate(**Configured in Accounts Settings**) shall be allowed to modify its value
  - Any manually entered Exchange Rate by an authorized user shall **override** the automatically fetched Exchange Rate and shall be considered the effective value for the transaction.

- **Use API to Get Exchange Rate**

- The system shall automatically create and retrieve the Exchange Rate using the configured external API.
- After the Exchange Rate is successfully created, the system shall populate the Exchange Rate field.
- The Exchange Rate field shall remain **read-only**.
- **Note:**
  - only users with the appropriate Role to edit the Exchange Rate(**Configured in Accounts Settings**) shall be allowed to modify its value
  - Any manually entered Exchange Rate by an authorized user shall **override** the automatically fetched Exchange Rate and shall be considered the effective value for the transaction.

- **Ignore Pricing Rule**
      - Checkbox
        - When checked, the system ignores any previously defined pricing rules.
  - **Consider Rejected Warehouses**
    - Checkbox
    - If the user wants the system to select from the rejected warehouses too, or when clicking on "Pick Manually", the rejected warehouses are displayed to the user in the [Warehouse](#) Field.
    - When checked, the rejected warehouses will be considered among the system's selection options and will also be displayed to the user when selecting manually.
  - **Pick Manually**
    - Checkbox
    - If the user wants to select the [warehouse](#) manually, they can enable the checkbox and choose the warehouse manually from the **Delivery Note Item** table.
    - When checked,
      - The system won't override the **picked Qty / batches / serial numbers / warehouse.**
    - When unchecked,
      - The user cannot select the [warehouse](#) manually, and the system automatically selects the warehouse based on the nearest expiry date of the selected items.
    - **Important Note:** it is enabled only when the "Submit For Picking" button is clicked.
  - **Scan Barcode**
    - Text input field
    - Allows the user to enter or scan a barcode.
    - optional.
    - Accepts letters,numbers and special characters.
    - Minimum length: 2 characters.
    - Maximum length: 100 characters.
    - Once the maximum limit is reached, further input will be prevented.
    - Note:
      - When a scan barcode option is selected, the system opens a device camera to scan a barcode and automatically populates the field with the scanned value.
      - If the user enters a barcode manually at a slow typing speed, the entered value is automatically cleared
    - **Important Note:** it is enabled only when the "Submit For Picking" button is clicked.
  - **Scan Mode**
    - Checkbox
    - **Notes:**
      - When checked, the user can use the [Scan Barcode](#) field to either enter the barcode manually or scan it
        - With each successfully scan, the [Picked Qty \(In Stock UOM\)](#) is automatically increased by 1

- When checked, and the user doesn't enter or scan any barcode in the [Scan Barcode](#) field:
    - An error message appears upon clicking on Save because the [Qty](#) doesn't match the [Picked Qty \(In Stock UOM\)](#) .
  - When checked, the user cannot enter the Picked Qty (In Stock UOM) manually
  - When unchecked, the user can enter the Picked Qty (In Stock UOM) manually
  - Both [Qty](#) and [Picked Qty \(In Stock UOM\)](#) must be equal.
  - **Important Note:** it is enabled only when the “Submit For Picking” button is clicked.
- **Prompt Quantity**
  - Checkbox
  - **Notes:**
    - When checked, and the user enters or scans a barcode in the [Scan Barcode](#) field, a pop-up is displayed asking the user to enter the quantity of the item that has just been scanned.
    - When checked, and the [Picked Qty \(In Stock UOM\)](#) is not entered, **NO** validation error is displayed upon clicking save.
    - **Important Note:** it is enabled only when the “Submit For Picking” button is clicked.
- **Delivery Note Items**
  - A table contain the following columns:
    - **Checkbox icon**
      - Multi selection
    - **No.**
      - Displays the ordering of items in the table
    - **Item**
      - Searchable DDL
      - Link “item” doctype
      - Only items with “Maintain Stock” enabled are displayed.
      - Single selection
      - Mandatory
      - If the field is left empty, an error message will appear.
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Warehouse**
      - Searchable DDL
      - Link “Warehouse” doctype
      - Displays only the child warehouses
      - Single selection
      - Mandatory
      - If the field is left empty, an error message will appear.
      - **Note:**
        - The user can select a warehouse manually only when the “[Pick Manually](#)” checkbox is checked.

- The user cannot select a warehouse manually when the "[Pick Manually](#)" option is unchecked. In this case, the system automatically selects the warehouse based on the nearest expiry date of the selected [item](#).
- the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

#### ■ Qty

- Text input field.
- To enter the Qty that will be delivered in the delivery note.
- Mandatory.
- Accept numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- If the field is left empty an error message appears.
- **Note: Qty = Actual Qty in the selected warehouse - Reserved Qty in that warehouse**
- **Note:** If a quantity less than the available quantity in the selected warehouse is entered, a warning message is displayed indicating that the entered quantity is less than the available quantity in the selected warehouse. Please "**Update the Item Location**" or enter an available quantity.

#### ■ Qty (In Stock UOM)

- Label field (read only)
- Displays the item Quantity to be picked in its default **UOM**

#### ■ Picked Qty (In Stock UOM)

- Text input field.
- To enter the Picked Qty
- optional.
- Accept numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- **Notes:**
  - When the "[Scan Mode](#)" checkbox is checked, the user cannot manually enter a value in the Picked Qty field.
  - When the "[Scan Mode](#)" checkbox is unchecked, the user can manually enter a value in the Picked Qty field.
  - **The [Picked Qty \(In Stock UOM\)](#) cannot be greater than the [Qty](#)**
  - **Important Note:** it is enabled only when the "Submit For Picking" button is clicked.

#### ■ Setting

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using **drag** and **drop** functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the

table.

- Column width
  - Text input field
  - For entering or edit the column width
  - Accepts numbers only
  - Minimum length: 1 character.
  - Maximum length: 3 characters.
  - Default value = 3
- Add / Remove columns
  - Button
  - For adding or removing columns from the table
  - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
  - These columns are:

| Column Name                                 |
|---------------------------------------------|
| Item Code                                   |
| Quantity                                    |
| UOM                                         |
| Rate                                        |
| Amount                                      |
| Warehouse                                   |
| Item Name                                   |
| Description                                 |
| Stock UOM                                   |
| UOM Conversion Factor                       |
| Qty in Stock UOM                            |
| Returned Qty in Stock UOM                   |
| Price List Rate                             |
| Price List Rate (Company Currency)          |
| Margin Type                                 |
| Margin Rate or Amount                       |
| Rate With Margin                            |
| Discount (%) on Price List Rate with Margin |

|  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

Project

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an Item is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item group(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the following fields:

| Field Name | Options                                                                                                                                                                                                                |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

- Button
- To add a new row in the table
- When clicked, a new row is added to the table.
- **Total Quantity**
  - Label field (read only)
  - Displays the total quantity of items entered in the [Delivery Note Items table](#).
- **Total Currency**
  - Label field (read only)
  - Displays the total amount of the item's quantity in the selected currency
- **Total Company's base Currency**
  - Label field (read only)
  - Displays the total amount of the item's quantity in the company's base currency
- **Total Net weight**
  - Label field (read only)
  - Displays the total net weight
- **Net Total Currency**
  - Label field (read only)
  - Displays the net total currency
- **Net Total Company's base Currency**
  - Label field (read only)
  - Displays the net total company's base currency
- **Taxes And Charges**
  - It contains the following fields:
    - **Tax category**
      - Searchable DDL
      - Link "Tax Category" doctype
      - To select a tax category
      - Single selection
      - Optional
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Shipping Rule**
      - Searchable DDL
      - Link "Shipping Rule" doctype
      - To select a shipping rule
      - Single selection
      - Optional
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Incoterm (Hidden)**
      - Searchable DDL
      - Link "Incoterm" doctype
      - Single selection
      - Optional

- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

#### ■ **Named Place (Hidden)**

- Text input field.
- To specify the location associated with the selected incoterm
- Optional
- Accept letters, numbers and special characters.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- **Note:** it appears only after selecting an Incoterm

#### ■ **Sales Taxes and Charges**

- A table contain the following columns:
  - **Checkbox icon**
    - Multi selection
  - **No.**
    - Displays the ordering of items in the table
  - **Type**
    - DDL
    - To select the sales taxes type
    - It contains the following values:
      - Actual
      - On Net Total
      - On Previous Row Amount
      - On Previous Row Total
      - On Item Quantity
    - Single selection
    - Mandatory
    - If the field is left empty, an error message will appear.
  - **Account Head**
    - Searchable DDL
    - Link “Accounts” doctype
    - To select an account head
    - Single selection
    - Mandatory
    - If the field is left empty, an error message will appear.
    - **Note:**
      - the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Tax Rate**
    - Text input field.
    - To enter the tax rate

- optional .
- Accept numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- **Net Amount Currency**
  - Label field
  - Displays the net amount currency
- **Amount Currency**
  - Label field
  - Displays the amount currency
- **Total Currency**
  - Label field
  - Displays the total currency
- **Setting**
  - When clicked, a pop up appears contains the following options :
    - Rearranging table columns using **drag** and **drop** functionality.
      - Users can click and hold a column header , then drag and drop it into the desired position within the table.
    - Column width
      - Text input field
      - For entering or edit the column width
      - Accepts numbers only
      - Minimum length: 1 character.
      - Maximum length: 3 characters.
      - Default value = 3
    - Add / Remove columns
      - Button
      - For adding or removing columns from the table
      - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
      - These columns are:

| Column Name      |
|------------------|
| Type             |
| Account Head     |
| Tax Rate         |
| Net Amount (USD) |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

      - Label field
      - It displays the grand total in the selected [Currency](#)
    - **Rounding Adjustment (Currency)**
      - Label field
      - It displays the rounding adjustment in the selected [Currency](#)
    - **Rounded Total (Currency)**
      - Label field
      - It displays the rounded total in the selected [Currency](#)
- **Totals (Company's base Currency)**
  - It contains the following fields:
    - **Grand Total (Company's base Currency)**
      - Label field
      - It displays the grand total in the selected Company's base Currency
    - **Rounding Adjustment (Company's base Currency)**
      - Label field
      - It displays the rounding adjustment in the selected Company's base Currency
    - 
    - **Rounded Total (Company's base Currency)**
      - Label field
      - It displays the rounded total in the selected Company's base Currency
- **Additional Discount**
  - It contains the following fields:
    - **Apply Additional Discount On**
      - DDL
      - To apply additional discount
      - It contains the following values:
        - Grand Total

- Net Total
  - Single selection
  - Optional
- **Additional Discount Percentage**
  - Text input field
  - To enter the Additional Discount Percentage
  - optional .
  - Accept numbers only.
  - When a number is entered, it is calculated as a percentage.
  - Maximum length: 100 characters.
  - Once the maximum length is reached, further input is prevented.
- **Additional Discount Amount (Company's base Currency)**
  - Label field
  - It displays the additional discount amount in company's base currency
- **Additional Discount Amount ([Currency](#))**
  - Text input field
  - To enter the Additional Discount amount using the selected currency
  - optional .
  - Accept numbers only.
  - Maximum length: 100 characters.
  - Once the maximum length is reached, further input is prevented.
- **Fixed Page Actions**
  - It contains the following:
    - **Update item Location**
      - Button
      - When clicked, the system automatically updates the item locations. If the selected warehouse does not contain the required quantity, the system updates the warehouse assignment based on the nearest expiry date to ensure the requested quantity can be fulfilled.
      - **Note:** it appears only when the delivery note status = **Draft**
    - **Get Items From Sales Order**
      - Button
      - When clicked, a pop up appears containing the following fields:
        - **Search**
        - The user can search by the following:
          - **Name**
            - Text input field
            - Users can search by the sales order name or any part of it.
            - Max length : 100 characters
            - Once the maximum limit is reached, further input will be prevented.
          - **Customer**
            - Searchable DDL

- Link “Customer” doctype
- Single selection
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Delivery Date**

- Date calendar picker
- Users can search by the delivery date or any part of it.

- **Sales order list**

- It contains only sales orders whose status is not equal to “Hold” or “Closed”
- A table contain the following columns:
  - **Checkbox icon**
    - Multi selection
  - **No.**
    - Displays the ordering of items in the table
  - **Name**
    - Label field
    - It displays the sales order name
    - Clickable
    - When clicked, it navigates the user to “sales order details” screen
  - **Customer (read-only)**
    - Label field
    - It displays the customer name
  - **Delivery Date (read-only)**
    - Label field
    - It displays the delivery date

- **Get Items**

- Button
- When a sales order(s) is selected and the user clicks the “Get Items” button, the sales order items are successfully fetched and indeed to the delivery note item table.

- **Delivery Note Workflow**

- On clicking on [Add Delivery Note](#) button, delivery Note creation Form opens
  - The following fields will be disabled:
    - [Pick manually \(checkbox\)](#)
    - [Scan barcode field](#)
    - [Scan mode \(checkbox\)](#)
    - [Prompt quantity \(checkbox\)](#)
    - [picked Qty field](#)
- After entering Delivery note details, and clicking on “Save” button

- If all required data is entered correctly and completely:
  - “Save” button changes to “Submit For Picking”
  - And Delivery Note status = **Draft**
- If incorrect or incomplete data is entered:
  - A validation error message is displayed for each invalid field.
- **Note:** the Picking-related fields remain disabled.
- On clicking on “Submit For Picking” :
  - “Submit For Picking” button changes to “Save”
  - And Delivery Note status changes from “Draft” to “To Pick”
  - The following fields will be enabled:
    - [Pick manually \(checkbox\)](#)
    - [Scan barcode field](#)
    - [Scan mode \(checkbox\)](#)
    - [Prompt quantity \(checkbox\)](#)
    - [picked Qty field](#)
- When start the Picking process:
  - If all required data is entered correctly and completely, and click on “Save”
    - The system compares [Picked Qty](#) with [Qty](#) :
      - If **Picked Qty** is equal **Qty**
        - Delivery Note status changes to **Picked**
        - And “Save” button changes to “Finish Picking”
      - If **Picked Qty** is smaller than equal **Qty**
        - Delivery Note status changes to **partially Picked**
        - And the “Save” button remains unchanged.
  - If incorrect or incomplete data is entered:
    - A validation error message is displayed for each invalid field.
  - **Note:**
    - **Field validation show error message immediately when invalid**
    - If the selected warehouse does not contain the required quantity, click on “[Update Item Location](#)”
      - When clicked, the system automatically updates the item locations. If the selected warehouse does not contain the required quantity, the system updates the warehouse assignment based on the nearest expiry date to ensure the requested quantity can be fulfilled.
- When the Delivery Note status is **Picked (only in this case)**
  - “Save” button changes to “Finish Picking”
- On clicking on “Finish Picking” :
  - “Finish Picking” button changes to “Deliver”
  - And Delivery Note status changes from “Picked” to “To Deliver”
  - **Note:** “Deliver” button appears only after clicking on **Finish Picking**
- On clicking on “Deliver” button:
  - If delivery Note linked to a Sales Invoice and sales invoice is **submitted**
    - Delivery Note Status changes from “To Deliver” to “Completed”
  - If delivery Note is not linked to a Sales Invoice and sales
    - Delivery Note Status changes from “To Deliver” to “To Pill”
    - And Delivery process starts

#### **Billing Address.**

- If no **Preferred Billing Address** is available,
  - The system fetches the **Primary Address**.
- If no **Primary Address** exists,
  - The system fetches the **latest created address**.
- The user can overwrite the automatically selected address by choosing another one.

#### ■ **Address**

- Label field (read only)
- It displays the address of the selected customer
- It displays the following data:
  - Address Description
  - City / town
  - State
  - Country

#### ■ **Contact Person**

- Searchable DDL
- Link "**Contact**" doctype
- **Note:** it's filtered to show only contacts that belong to the "**Customer**" or "**Lead**"
- Single selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Important Note:**
  - The system automatically fetches the customer's **Preferred Billing Contact**.
  - If no **Preferred Billing Contact** is available,
    - The system fetches the **Primary Contact**.
  - If no **Primary Contact** exists,
    - The system fetches the **latest created Contact**.
  - The user can overwrite the automatically selected contact by choosing another one.

#### ■ **(Contact Details)**

- Label field (read only)
- It displays all contact numbers and Emails ID of the selected [contact person](#)
- **Note:**
  - UI must clearly tell which:
    - **Number is the primary phone**
    - **Email ID is the primary Email**

#### ● **Shipping Address**

- It contains the following fields:

#### ■ **Shipping Address**

- Searchable DDL
- Link "**Address**" doctype

- Displays all addresses associated with the customer in the Quotation to select the customer shipping address.
- Single selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Important Note:**
  - The system automatically fetches the customer's **Preferred Shipping Address**.
  - If no **Preferred Shipping Address** is available,
    - The system fetches the **Primary Address**.
  - If no **Primary Address** exists,
    - The system fetches the **latest created address**.
  - The user can overwrite the automatically selected address by choosing another one.

#### ■ Shipping Address

- Label field (read only)
- It displays the shipping address of the selected [shipping address](#)
- It displays the following data:
  - Address Description
  - City / town
  - State
  - Country

#### • Company Address

- It contains the following fields:

##### ■ Company Address Name

- Searchable DDL
- Link "**Address**" doctype
- Displays all company addresses to select the company address name.
- Single selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Note:**
  - **Company primary address** is fetched
  - If **Company primary address** is not found
    - The latest company address is fetched.

##### ■ Company Address

- Label field (read only)
- It displays the company address of the selected [Company Address Name](#)
- It displays the following data:
  - Address Description
  - City / town

- State
- Country

#### ■ Contact Person

- Searchable DDL
- Link “**Contact**” doctype
- **Note:** it's filtered to show only contacts that belong to the selected company and the “**Is Your Company Contact**” checked.
- Single selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Important Note:**
  - The system automatically fetches the company's **Preferred Billing Contact**.
  - If no **Preferred Billing Contact** is available,
    - The system fetches the **Primary Contact**.
  - If no **Primary Contact** exists,
    - The system fetches the **latest created Contact**.
  - The user can overwrite the automatically selected contact by choosing another one.

#### ■ (Contact Details)

- Label field (read only)
- It displays all contact numbers and Emails ID of the selected Contact Person
- **Note:**
  - UI must clearly tell which:
    - **Number is the primary phone**
    - **Email ID is the primary Email**

#### ● Terms

- Searchable DDL
- Link “**Terms and Condition**” doctype
- Single selection
- Optional
- When a value is selected from the terms DDL, the terms and condition content field is automatically filled based on the selected value.
- **Note:**
  - **If no terms and conditions are entered, the terms and conditions section is not displayed on the [Delivery Note Details](#) page**
  - the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

#### ● Terms and Condition Content

- Text area
- For adding detailed terms and condition content.
- Optional
- Accepts letters, numbers, and special characters.
- Minimum length: 3 characters.

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

- **Deliver**
  - It appears only when the delivery note status = **Picked**.
  - If all required data is entered correctly and completely:
    - The delivery note is successfully submitted (Delivered).
- **Cancel**
  - It appears only when the delivery note status = **Submitted (To Bill)**
  - When clicked,
    - The Delivery Note is canceled successfully.
- **Delete**
  - It appears only when the delivery note status = **Submitted (To Bill)**
  - When clicked,
    - A confirmation message is displayed to the user whether they want to delete this delivery note
    - Upon clicking the “Yes” button:
      - If the delivery note is Amended from other delivery note
        - A warning message appears indicating that this delivery note cannot be deleted until the user deletes all doctypes related to it.
        - The warning message displays the linked doctypes as hyperlinks; they are redirected to the corresponding doctype.
      - if the Delivery Note is linked to other transactions,
        - a message is displayed informing the user that the linked transactions must be deleted before the Delivery Note can be deleted.
        - The warning message displays the linked doctypes as hyperlinks; they are redirected to the corresponding doctype.
      - If the delivery note isn’t linked to another doctype
        - The delivery note is deleted successfully.

- **Connections Tab**

- It contains the following values:
  - **Sales Invoice**
    - Button
    - Link “Sales Invoice” doctype
  - **Packing Slip**
    - Button
    - Link “Packing Slip” doctype
  - **Delivery Trip**
    - Button
    - Link “Delivery Trip” doctype
  - **Sales Order**
    - Button
    - Link “Sales Order” doctype
  - **Shipment**
    - Button
    - Link “Shipment” doctype

- For adding a description to this Quality Inspection
- Optional
- Accepts letters, numbers, and special characters.
- Minimum length: 3 characters.
- Maximum length: 500 characters.
- Once the maximum limit is reached, further input will be prevented.
- An error message will appear if the entered text is less than the minimum length.
- An error message will appear if invalid data is entered.

- **Item Serial No**

- Searchable DDL
- Link **“Serial No” doctype**
- Single selection
- Optional
- **Note:** it displays only the Serial Nos associated with the selected Item code
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Batch No**

- Searchable DDL
- Link **“Batch No” doctype**
- Single selection
- Optional
- **Note:** it displays only the Serial Nos associated with the selected Item code
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Sample Size**

- Text input field.
- To enter the sample size
- Mandatory.
- Accept numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- If the field is left empty an error message appears.

- **Quality Inspection Template**

- Searchable DDL
- Link **“Quality Inspection Template” doctype**
- Single selection
- Optional
- When a template is selected, the system fetches its data and automatically populates the [Readings](#) table.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Manual Inspection**

- Checkbox
- When checked,
  - The user can manually select the [status](#) for each reading.
  - The Manual Inspection will be enabled for all rows in the [Readings](#) table.
- When unchecked,

- The system automatically determines the reading status based on the entered [Minimum Value](#) and [Maximum Value](#).
- If the entered values do not match any of the predefined ranges in the Quality Inspection Template, the [status](#) is automatically set to Rejected.
- If the entered values fall within a predefined range in the Quality Inspection Template, the [status](#) is automatically set to Accepted.

- **Readings**

- A table contain the following columns:

- **Checkbox icon**

- Multi selection

- **No.**

- Displays the ordering of items in the table

- **Parameter**

- Searchable DDL
- Link "[Quality Inspection Parameter](#)" doctype
- Single selection
- Mandatory
- If the field is left empty, an error message will appear.
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Status**

- DDL
- It contains the following values:
  - Empty
  - Accepted
  - Rejected
- Single selection
- Optional
- It's default value is "**Empty**"

- **Numeric**

- Checkbox
- In case the reading is digital or not.

- **Reading Value**

- Label field
- It displays the actual reading value.

- **Reading 1**

- Text input field.
- To enter reading description or name
- Optional .
- Accepts letters, numbers and special characters.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.

- **Setting**

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using **drag** and **drop** functionality.

- Users can click and hold a column header , then drag and drop it into the desired position within the table.
- Column width
  - Text input field
  - For entering or edit the column width
  - Accepts numbers only
  - Minimum length: 1 character.
  - Maximum length: 3 characters.
  - Default value = 3
- Add / Remove columns
  - Button
  - For adding or removing columns from the table
  - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
  - These columns are:

| Column Name                 |
|-----------------------------|
| Parameter                   |
| Status                      |
| Numeric                     |
| Reading Value               |
| Reading 1                   |
| Parameter Group             |
| Acceptance Criteria Value   |
| Manual Inspection           |
| Minimum Value               |
| Maximum Value               |
| Formula Based Criteria      |
| Acceptance Criteria Formula |
| Reading 2                   |
| Reading 3                   |
| Reading 4                   |
| Reading 5                   |

Reading 6

Reading 7

Reading 8

Reading 9

Reading 10

- Users can show or hide columns by selecting or deselecting the related checkbox.
- “Update” button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when an Item is selected , an action bar appears showing the following actions:
  - Delete row
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item group(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the following fields:

| Field Name | Options                                                                                                                                                                                                                                                                                                                                                                                         |

- **Inspected By**
  - Searchable DDL
  - Link “User” doctype
  - Single selection
  - Mandatory
  - If the field is left empty, an error message will appear.
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Verified By**
  - Text input field
  - To enter the name of the person who verified the inspection.
  - optional
  - Accept letters, numbers and special characters.
  - Maximum length: 100 characters.
  - Once the maximum length is reached, further input is prevented.
- **Remarks**
  - Text area
  - Allows the user to enter comments or notes describing the purpose of the Quality Inspection.
  - Optional
  - Accepts letters, numbers, and special characters.
  - Minimum length: 3 characters.
  - Maximum length: 500 characters.
  - Once the maximum limit is reached, further input will be prevented.
  - An error message will appear if the entered text is less than the minimum length.
- **Amended From**
  - Label field
  - Displays the Quality Inspection from which this document was amended.
  - Clickable
  - When clicked, it navigates the user to the Quality Inspection from which this document was amended.
  - **Note:** This field is displayed only if this Quality Inspection is amended from another Quality Inspection
- **Print Settings**
  - It contains the following field:
    - **Letter Head**
      - Searchable DDL
      - Link “Letter Head” doctype
      - Single selection
      - optional,
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Save**
  - Button
  - When clicked,
    - If all required data is entered correctly and completely:

- Optional
  - Accepts letters, numbers, and special characters.
  - Minimum length: 2 characters.
  - Maximum length: 500 characters.
  - Once the maximum limit is reached, further input will be prevented.
  - An error message will appear if the entered text is less than the minimum length.
  - An error message will appear if invalid data is entered.
- **Save**
  - Button
  - When clicked,
    - If all required data is entered correctly and completely:
      - The Parameter is successfully saved and added to the Quality Inspection Parameter List
    - If incorrect or incomplete data is entered:
      - A validation error message is displayed for each invalid field.
- **Quality Inspection Parameter List**
  - **A table contain the following columns:**
    - Checkbox icon
      - Multi selection
    - ID
      - It displays the parameter ID
      - Clickable
      - When clicked, a pop up appears containing the fields defined in the creation form to view or edit the parameter details.
    - Parameter
      - Displays the parameter name .
    - Parameter Group
      - Displays the parameter group.
- **Note:** when a parameter is selected , an action bar appears showing the following actions:
  - Edit
    - Button
    - When clicked , a popup appears containing the following fields.
      - **Field**
        - DDL
        - To select the field you want to edit
        - Link “Quality Inspection Parameter” doctype
        - Single selection
        - Mandatory
      - **Value**
        - Dynamic field
        - Based on the selected option from the first dropdown field, the second field shall :
          - Dynamically change it’s input type
          - Be marked as either mandatory
          - Or optional

- Checkbox
  - When checked, the system ignores any previously defined pricing rules.

- **Scan Barcode**

- Text input field
- Allows the user to enter or scan a barcode.
- optional.
- Accepts letters,numbers and special characters.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- **Note:**
  - When a scan barcode option is selected, the system opens a device camera to scan a barcode and automatically populates the field with the scanned value.
  - If the user enters a barcode manually at a slow typing speed, the entered value is automatically cleared

- **Accepted Warehouse**

- Searchable DDL
- Link “Warehouse” doctype
- Displays only the child warehouses
- Single selection
- Optional

- **Rejected Warehouse**

- Searchable DDL
- Link “Warehouse” doctype
- Displays only the child warehouses and the “Is Rejected Warehouse” option is enabled.
- Single selection
- Optional

- **Purchase Receipt Items**

- A table contain the following columns:
  - **Checkbox icon**
    - Multi selection
  - **No.**
    - Displays the ordering of items in the table
  - **Item code**
    - Searchable DDL
    - Link “item” doctype
    - Only items with “Allow Purchase” enabled are displayed.
    - Single selection
    - Mandatory
    - If the field is left empty, an error message will appear.
    - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Accepted Qty**

- Text input field.
- To enter the Qty that will be Accepted in the Purchase Receipt.
- Mandatory.
- Accept numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- If the field is left empty an error message appears.

#### ■ **Rejected Qty**

- Text input field.
- To enter the Qty that will be Rejected in the Purchase Receipt.
- Optional .
- Accept numbers only.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.

#### ■ **Rate**

- Text input field
- Displays automatically the unit price of the item in the document currency
- Can be edited.
- Accepts numbers only.

#### ■ **Amount**

- Label field
- Displays the total amount of the item calculated in the document currency.

#### ■ **Accepted Warehouse**

- Searchable DDL
- Link “Warehouse” doctype
- Displays only the child warehouses
- Single selection
- Mandatory
- If the field is left empty, an error message will appear.

#### ■ **Setting**

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using **drag** and **drop** functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button

- For adding or removing columns from the table
- When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
- These columns are:

| Column Name                        |

- **Add Row**
  - Button
  - To add a new row in the table
  - When clicked, a new row is added to the table.
- **Total Quantity**
  - Label field (read only)
  - Displays the total quantity of items entered in the **Purchase Receipt items table** .
- **Total Currency**
  - Label field (read only)
  - Displays the total amount of the item’s quantity in the selected currency
- **Total Company’s base Currency**
  - Label field (read only)
  - Displays the total amount of the item’s quantity in the company’s base currency

- **Total Net weight**
  - Label field (read only)
  - Displays the total net weight
- **Net Total Currency**
  - Label field (read only)
  - Displays the net total currency
- **Net Total Company's base Currency**
  - Label field (read only)
  - Displays the net total company's base currency
- **Taxes And Charges**
  - It contains the following fields:
    - **Tax category**
      - Searchable DDL
      - Link “Tax Category” doctype
      - To select a tax category
      - Single selection
      - Optional
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Shipping Rule**
      - Searchable DDL
      - Link “Shipping Rule” doctype
      - To select a shipping rule
      - Single selection
      - Optional
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Incoterm**
      - Searchable DDL
      - Link “Incoterm” doctype
      - Single selection
      - Optional
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Purchase Taxes and Charges Template**
      - Searchable DDL
      - Link “Purchase Taxes and Charges Template” doctype
      - Single selection
      - Optional
      - **Note:** When a Purchase Taxes and Charges Template is selected from the list, its data is automatically fetched into the Purchase Taxes and Charges table.
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a

predefined list of values.

■ **Named Place**

- Text input field.
- To specify the location associated with the selected incoterm
- Optional
- Accept letters, numbers and special characters.
- Maximum length: 100 characters.
- Once the maximum length is reached, further input is prevented.
- **Note:** it appears only after selecting an Incoterm

■ **Sales Taxes and Charges**

- A table contain the following columns:

○ **Checkbox icon**

- Multi selection

○ **No.**

- Displays the ordering of items in the table

○ **Type**

- DDL

- To select the sales taxes type

- It contains the following values:

- Actual
- On Net Total
- On Previous Row Amount
- On Previous Row Total
- On Item Quantity

- Single selection

- Mandatory

- If the field is left empty, an error message will appear.

○ **Account Head**

- Searchable DDL

- Link “Accounts” doctype

- To select an account head

- Single selection

- Mandatory

- If the field is left empty, an error message will appear.

- **Note:**

- the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

○ **Tax Rate**

- Text input field.

- To enter the tax rate

- optional .

- Accept numbers only.

- Maximum length: 100 characters.

- Once the maximum length is reached, further input is prevented.
- **Net Amount [Currency](#)**
  - Label field
  - Displays the net amount currency
- **Amount [Currency](#)**
  - Label field
  - Displays the amount currency
- **Total [Currency](#)**
  - Label field
  - Displays the total currency
- **Setting**
  - When clicked, a pop up appears contains the following options :
    - Rearranging table columns using **drag** and **drop** functionality.
      - Users can click and hold a column header , then drag and drop it into the desired position within the table.
    - Column width
      - Text input field
      - For entering or edit the column width
      - Accepts numbers only
      - Minimum length: 1 character.
      - Maximum length: 3 characters.
      - Default value = 3
    - Add / Remove columns
      - Button
      - For adding or removing columns from the table
      - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
      - These columns are:

| Column Name      |
|------------------|
| Type             |
| Account Head     |
| Tax Rate         |
| Net Amount (USD) |
| Amount (USD)     |
| Total (USD)      |

    - Once the maximum length is reached, further input is prevented.
- **Fixed Page Actions**
  - It contains the following:
    - **Get Items From**
      - DDL
      - It contains the following fields:
      - **Purchase Invoice**
        - Button
        - When clicked, a pop up appears containing the following fields:
          - **Search**
            - The user can search by the following:
              - **Name**
                - Text input field
                - Users can search by the purchase invoice name or any part of it.
                - Max length : 100 characters
                - Once the maximum limit is reached, further input will be prevented.

- **Supplier**

- Searchable DDL
- Link “**supplier**” doctype
- Single selection
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Purchase Invoice list**

- It contains only purchase invoices whose status is not equal to “**Hold**” or “**Closed**”
- A table contain the following columns:
  - **Checkbox icon**
    - Multi selection
  - **No.**
    - Displays the ordering of items in the table
  - **Name**
    - Label field
    - It displays the purchase invoice name
    - Clickable
    - When clicked, it navigates the user to “purchase invoice details” screen
  - **Supplier (read-only)**
    - Label field
    - It displays the supplier name

- **Get Items**

- Button
- When a purchase invoice(s) is selected and the user clicks the “**Get Items**” button, the purchase invoice items are successfully fetched and indeed to the purchase receipt items table.

- **Purchase order**

- Button
- When clicked, a pop up appears containing the following fields:

- **Search**

- The user can search by the following:

- **Name**

- Text input field
- Users can search by the purchase order name or any part of it.
- Max length : 100 characters

- Single selection
  - Optional
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Shipping Address template**
  - Searchable DDL
  - Link “Address” doctype
  - Displays all company addresses to select the dispatch address.
  - Single selection
  - Optional
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Company Billing Address**
  - It contains the following fields:
    - **Billing Address**
      - Searchable DDL
      - Link “Address” doctype
      - Displays all company addresses to select the company Billing address.
      - Single selection
      - Optional
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Terms**
  - Searchable DDL
  - Link “Terms and Condition” doctype
  - Single selection
  - Optional
  - When a value is selected from the terms DDL, the terms and condition content field is automatically filled based on the selected value.
  - **Note:**
    - **If no terms and conditions are entered, the terms and conditions section is not displayed on the [Purchase Receipt Details](#) page**
    - the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Terms and Condition Content**
  - Text area
  - For adding detailed terms and condition content.
  - Optional
  - Accepts letters, numbers, and special characters.
  - Minimum length: 3 characters.
  - Maximum length: 500 characters.
  - Once the maximum limit is reached, further input will be prevented.
  - An error message will appear if the entered text is less than the minimum length.

- Text input field
  - To enter the vehicle number
  - optional
  - Accept letters, numbers and special characters.
  - Maximum length: 100 characters.
  - Once the maximum length is reached, further input is prevented.
- **Vehicle Date**
  - Date calendar picker
  - Optional
- **Print Settings**
  - It contains the following fields:
    - **Letter Head**
      - Searchable DDL
      - Link “**Letter Head**” doctype
      - Single selection
      - optional,
      - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Language**
      - Label field
      - It displays the language selected in the print settings.
    - **Print without Amount**
      - Checkbox
      - If checked, the printing will be generated without amounts.
    - **Group same items**
      - Checkbox
      - To group the same items during printing.
- **Additional Info**
  - It contains the following fields:
    - **Instructions**
      - Text area
      - Allows the user to enter instructions
      - Optional
      - Accepts letters, numbers, and special characters.
      - Minimum length: 3 characters.
      - Maximum length: 500 characters.
      - Once the maximum limit is reached, further input will be prevented.
      - An error message will appear if the entered text is less than the minimum length.
    - **Remarks**
      - Text area
      - Allows the user to enter comments or notes describing the purpose of the Purchase Receipt.
      - Optional
      - Accepts letters, numbers, and special characters.
      - Minimum length: 3 characters.

- Time picker
- To select the Stock entry posting time
- Default value is (**current time**)
- **Note:** it is enabled only when the [Edit posting and date time](#) checkbox is checked

- **Edit Posting And Date Time**

- Checkbox
- When checked, the user can modify the [Posting Date](#) and [Posting Time](#)
- When unchecked, the [Posting Date](#) and [Posting Time](#) fields become read-only and cannot be edited.

- **Add To Transit**

- Checkbox
- Enable this option to transfer items to a **Transit Warehouse** before they are received in the **Target warehouse**.
- **Note:** It appears only when the Stock Entry Type is "**Material Transfer**"
- **When checked, a filter is applied to the [Target Warehouse](#) field to display only Transit Warehouses.**

- **Inspection Required**

- Checkbox
- To apply a quality inspection on the stock entry items
- **Note:** when checked, After saving and submitting, a "Create Quality Inspection" option appears under the "Create" menu. When selected, the user is redirected to the Add Quality Inspection screen to create a Quality Inspection for this Stock Entry.

- **Stock Entry (Outward GIT)**

- Label field (read only)
- Displays the **outbound** stock entry that moved the items to the transit warehouse
- Clickable
- When clicked, it navigates the user to the outbound stock entry
- Note: it appears only when the current stock entry is an **inbound** transit entry created from the original outbound transit stock entry.

- **Default Source Warehouse**

- The user can select a default Source warehouse to automatically populate the Warehouse field for all items in the item table, but only for rows where the Warehouse field is empty. Existing warehouse values will not be overwritten.
- Searchable DDL
- Link "**Warehouse**" doctype
- Displays only child warehouses where the "Is Group warehouse" option is disabled.
- Single selection
- Optional
- It disappears when the stock entry type is **Material Receipt**
- **Note:**
  - the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Source Warehouse Address Link**

- Searchable DDL

- Link “Address” doctype
- Single selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Default Target Warehouse**

- The user can select a default Target warehouse to automatically populate the Warehouse field for all items in the item table, but only for rows where the Warehouse field is empty. Existing warehouse values will not be overwritten.
- Searchable DDL
- Link “Warehouse” doctype
- Displays only child warehouses where the “Is Group warehouse” option is disabled.
- Single selection
- Optional
- It disappears when the stock entry type is **Material Issue**
- **Note:**
  - the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Important Note:** when “Add To Transit” checkbox is checked:
  - **A filter is applied on the Target Warehouse field to display only warehouses of type Transit Warehouse.**

- **Target Warehouse Address Link**

- Searchable DDL
- Link “Address” doctype
- Single selection
- Optional
- **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Scan Barcode**

- Text input field
- Allows the user to enter or scan a barcode.
- optional.
- Accepts letters,numbers and special characters.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- Note:
  - When a scan barcode option is selected, the system opens a device camera to scan a barcode and automatically populates the field with the scanned value.
  - If the user enters a barcode manually at a slow typing speed, the entered value is automatically cleared

- **Items**

- A table contain the following columns:
  - **Checkbox icon**
    - Multi selection

- **No.**
  - Displays the ordering of items in the table
- **Source Warehouse**
  - Searchable DDL
  - Link “Warehouse” doctype
  - Displays only child warehouses where the “Is Group warehouse” option is disabled.
  - Single selection
  - Mandatory
  - It disappears when the stock entry type is **Material Receipt**
  - If the field is left empty, an error message will appear.
  - **Note:** The entered value takes priority and is not affected by the value selected in the Set Warehouse field.
- **Target Warehouse**
  - Searchable DDL
  - Link “Warehouse” doctype
  - Displays only child warehouses where the “Is Group warehouse” option is disabled.
  - Single selection
  - Optional
  - It disappears when the stock entry type is **Material Issue**
  - If the field is left empty, an error message will appear.
  - **Note:** The entered value takes priority and is not affected by the value selected in the Set Warehouse field.
  - **Important Note:** when “Add To Transit” checkbox is checked:
    - **A filter is applied on the Target Warehouse field to display only warehouses of type Transit Warehouse.**
- **Item Code**
  - Searchable DDL
  - Link “Item” doctype
  - Single selection
  - Mandatory
  - If the field is left empty, an error message will appear.
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
- **Qty**
  - Text input field
  - For entering the stock quantity for this item.
  - Mandatory.
  - Accepts numbers only.
  - Minimum length: 2 characters.
  - Maximum length: 100 characters.
  - Once the maximum limit is reached, further input will be prevented.
  - An error message will appear if the entered text is less than the minimum length.

- If the field is left empty an error message appears.
- **Basic Rate (as per stock UOM)**
  - Label field (read only)
  - Displays the item valuation Rate
- **Setting**
  - When clicked, a pop up appears contains the following options :
    - Rearranging table columns using drag and drop functionality.
      - Users can click and hold a column header , then drag and drop it into the desired position within the table.
    - Column width
      - Text input field
      - For entering or edit the column width
      - Accepts numbers only
      - Minimum length: 1 character.
      - Maximum length: 3 characters.
      - Default value = 3
    - Add / Remove columns
      - Button
      - For adding or removing columns from the table
      - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
      - These columns are:

| Column Name                   |
|-------------------------------|
| Source Warehouse              |
| Target Warehouse              |
| Item Code                     |
| Qty                           |
| Basic Rate (as per Stock UOM) |
| Item Name                     |
| Type                          |
| Quality Inspection            |
| Description                   |
| Item Group                    |
| Qty as per Stock UOM          |

|  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

- To reset all modifications to their default values.
- When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when a row is selected , an action bar appears showing the following actions:
  - **Delete row**
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item(s) will be deleted
  - **Edit Row**
    - Clickable icon
    - Users can edit and view non displayed fields in the table.
    - When clicked , a pop up appears containing the following fields:

| Field Name       | Options                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

- When clicked, a pop up appears containing the following fields:
  - **Search**
    - The user can search by the following:
      - **Name**
        - Text input field
        - Users can search by the sales order name or any part of it.
        - Max length : 100 characters
        - Once the maximum limit is reached, further input will be prevented.
      - **Supplier**
        - Searchable DDL
        - Link “**Supplier**” doctype
        - Single selection
        - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
  - **Purchase Invoice list**
    - A table contain the following columns:
      - **Checkbox icon**
        - Multi selection
      - **No.**
        - Displays the ordering of items in the table
      - **Name**
        - Label field
        - It displays the Purchase Invoice name
        - Clickable
        - When clicked, it navigates the user to “**Purchase Invoice details**” screen
      - **Supplier (read-only)**
        - Label field
        - It displays the supplier name
  - **Get Items**
    - Button
    - When a Purchase Invoice(s) is selected and the user clicks the “**Get Items**” button, the Purchase Invoice items are successfully fetched and indeed to the items table.

- **Material Request**

- Button
- When clicked, a pop up appears containing the following

fields:

- **Search**

- The user can search by the following:

- **Name**

- Text input field
    - Users can search by the sales order name or any part of it.
    - Max length : 100 characters
    - Once the maximum limit is reached, further input will be prevented.

- **Purpose**

- DDL
    - It contains the following values:
      - Material Transfer
      - Material Issue
      - **Purchase**
    - Single selection

- **Material Request list**

- **Note:** it displays only Material Requests whose status is **Pending**

- A table contain the following columns:

- **Checkbox icon**
      - Multi selection
    - **No.**
      - Displays the ordering of items in the table
    - **Name**
      - Label field
      - It displays the Material Request name
      - Clickable
      - When clicked, it navigates the user to “**Material Request details**” screen
    - **Material Request Type**
      - Label field
      - It displays the material Request type
      - It displays one of the following values:
        - Material Transfer
        - Material Issue
        - **Purchase**
    - **Customer**
      - Label field
      - It displays the customer name

- **Note:** When the Material Request purpose is

set to **Purchase**, only Material Requests whose status isn't equal to **Ordered**, **Request for Quotation**, **Supplier Quotation** are displayed.

■ **Get Items**

- Button
- When a Material Request(s) is selected and the user clicks the “**Get Items**” button, the Material Request items are successfully fetched and indeed to the items table.

● **Expired Batches**

- Button
- When clicked, the system retrieves all items associated with expired batches, along with their available quantities in the warehouses, and automatically fetches them into the [Items](#) table
- **Note:** The [Batch No](#) field is automatically populated based on the expired batches retrieved by the system

● **Transit Entry**

- Button
- When clicked, a pop up appears containing the following fields:

■ **Search**

- The user can search by the following:

● **Name**

- Text input field
- Users can search by the sales order name or any part of it.
- Max length : 100 characters
- Once the maximum limit is reached, further input will be prevented.

● **Stock Entry Type**

- Label field (read only)
- It displays the stock Entry type “**Material Transfer**”

■ **Stock Entry list**

- A table contain the following columns:

- **Checkbox icon**
  - Multi selection
- **No.**
  - Displays the ordering of items in the table
- **Name**
  - Label field
  - It displays the Material Request name
  - Clickable

- An error message will appear if the entered text is less than the minimum length.
- If the field is left empty an error message appears.

#### ■ **Setting**

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button
    - For adding or removing columns from the table
    - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
    - These columns are:

| Column Name               |
|---------------------------|
| Expense Account           |
| Description               |
| Amount                    |
| Account Currency          |
| Exchange Rate             |
| Amount (Company Currency) |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- **“Update”** button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved

- “Reset to default” button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when a row is selected , an action bar appears showing the following actions:
  - **Delete row**
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item(s) will be deleted
  - **Edit Row**
    - Clickable icon
    - Users can edit and view non displayed fields in the table.
    - When clicked , a pop up appears containing the following fields:

| Field Name      | Options                                                                                                                                                                                                                                                                                                                                                                                               |

- Label field (read only)
- It displays the reference document number that generated the stock transaction.
- Clickable
- When clicked, it navigates the user to the corresponding document
- **Voucher Detail No**
  - Label field (read only)
  - It displays the reference line item within the source document
- **Serial and Batch Bundle**
  - Label field (read only)
  - It displays the Serial and Batch Bundle associated with the stock transaction.
- **Dependant SLE Voucher Detail No**
  - Label field (read only)
  - It displays the dependent Stock Ledger Entry voucher detail referenced by this transaction
- **Recalculate Incoming / Outgoing Rate**
  - Checkbox icon (read only)
  - Indicates whether the system recalculate the incoming or outgoing valuation rate for this transaction
- **Qty Change**
  - Label field (read only)
  - Displays the quantity added to or deducted from stock by this transaction.
- **Qty after Transaction**
  - Label field (read only)
  - Displays the available stock quantity after processing the transaction.
- **Incoming Rate**
  - Label field (read only)
  - Displays the incoming valuation rate applied to the stock transaction
- **Outgoing Rate**
  - Label field (read only)
  - Displays the outgoing valuation rate applied to the stock transaction
- **Average Rate**
  - Label field (read only)
  - Displays the average valuation rate of the item after the transaction.
- **Balance Stock Value**
  - Label field (read only)
  - Displays the total stock value remaining after the transaction.
- **Change In Stock Value**
  - Label field (read only)
  - Displays the increase or decrease in stock value caused by the transaction.
- **FIFO Stock Queue (Qty,Rate)**

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

- **Note:** It's displayed only when the Based On = Item and Warehouse

■ **Posting Date**

- Label field (read only)
- Displays the posting date from which the reposting process started
- **Note:** it's displayed only when the "Based On" field = Item and Warehouse

■ **Posting Time**

- Label field (read only)
- Displays the posting time from which the reposting process started.
- **Note:** it's displayed only when the "Based On" field = Item and Warehouse

■ **Status**

- Label field (read only)
- Displays the current status of the reposting process.
- It displays one of the following values:
  - Queued
  - In Progress
  - Completed
  - Skipped
  - Failed
  - Cancelled

■ **Company**

- Label field (read only)
- Displays the company for which the reposting process executed

■ **Reposting Reference**

- Label field (read only)
- Displays the reference document associated with the reposting process.

■ **Repost Only Accounting Ledgers**

- Label field (read only)
- Displays whether the accounting ledger entries are reposted without updating stock ledger entries
- **Note:** It's displayed only when the Based On = Transaction

■ **Allow Negative Stock**

- Label field (read only)
- Indicates whether the reposting process to continue even if negative stock exists

■ **Via Landed Cost Voucher**

- Label field (read only)
- Indicates that the reposting process is triggered by a Landed Cost Voucher.

■ **Allow Zero Rate**

- Label field (read only)
- Displays whether reposting is allowed even when the valuation rate is zero

■ **Recreate Stock Ledgers**

    - When clicked, the selected item(s) will be deleted
- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.

- When clicked , a pop up appears containing the following fields:

| Field Name     | Options                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Vendor Invoice | <ul style="list-style-type: none"> <li>● Searchable DDL</li> <li>● Link “<b>Purchase Invoice</b>” doctype</li> <li>● It displays only submitted invoices and the invoice items must be non stock items (<b>maintain stock =0</b>) and (<b>Outstanding Amount = 0</b>)</li> <li>● To select a vendor invoice</li> <li>● Single selection</li> <li>● Optional</li> <li>● <b>Note:</b> the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.</li> </ul> |
| Amount         | <ul style="list-style-type: none"> <li>● Label field (read only)</li> <li>● It displays the total amount of the vendor Invoice</li> <li>● <b>Note:</b> this amount is added to the landed cost amount</li> </ul>                                                                                                                                                                                                                                                                                                                           |

- **Add Row**

- Button
- To add a new row in the table
- When clicked, a new row is added to the table.

- **Landed Cost**

- A table contain the following columns:

- **Checkbox icon**
  - Multi selection
- **No.**
  - Displays the ordering of items in the table
- **Expense Account**
  - Searchable DDL
  - Link “**Account**” doctype
  - Single selection
  - Optional
  - **Note:** the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Description**
  - Text area
  - For adding a description to this landed cost
  - mandatory
  - Accepts letters, numbers, and special characters.
  - Minimum length: 3 characters.
  - Maximum length: 500 characters.
  - Once the maximum limit is reached, further input will be prevented.
  - An error message will appear if the entered text is less than the minimum length.
  - If the field is left empty, an error message will appear.
- **Landed Cost Amount**
  - Text input field
  - To enter the Landed Cost Amount
  - mandatory.
  - Accepts numbers only.
  - Minimum length: 1 character.
  - Maximum length: 100 characters.
  - Once the maximum limit is reached, further input will be prevented.
  - If the field is left empty an error message appears.
  - **Note:** field name in ERPNext is “**Amount**”
- **Setting**
  - When clicked, a pop up appears contains the following options :
    - Rearranging table columns using drag and drop functionality.
      - Users can click and hold a column header , then drag and drop it into the desired position within the table.
    - Column width
      - Text input field
      - For entering or edit the column width
      - Accepts numbers only
      - Minimum length: 1 character.
      - Maximum length: 3 characters.
      - Default value = 3
    - Add / Remove columns
      - Button
      - For adding or removing columns from the table
      - When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
      - These columns are:

| Column Name               |
|---------------------------|
| Expense Account           |
| Description               |
| Amount                    |
| Account Currency          |
| Exchange Rate             |
| Amount (Company Currency) |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- **“Update”** button
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- **“Reset to default”** button
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when a row is selected , an action bar appears showing the following actions:
  - **Delete row**
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item(s) will be deleted

- **Edit Row**
  - Clickable icon
  - Users can edit and view non displayed fields in the table.
  - When clicked , a pop up appears containing the following fields:

| Field Name | Options |
|------------|---------|
|------------|---------|

|  |  |                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

- Time picker
- To select the Stock Reconciliation posting time
- Default value is (**current time**)
- **Note:** it is enabled only when the [Edit posting and date time](#) checkbox is checked

- **Edit Posting And Date Time**

- Checkbox
- When checked, the user can modify the [Posting Date](#) and [Posting Time](#)
- When unchecked, the [Posting Date](#) and [Posting Time](#) fields become read-only and cannot be edited.

- **Default Warehouse**

- The user can select a default warehouse to automatically populate the Warehouse field for all items in the [items](#) table, but only for rows where the Warehouse field is empty. Existing warehouse values will not be overwritten.
- Searchable DDL
- Link “Warehouse” doctype
- Displays only child warehouses where the “Is Group warehouse” option is disabled.
- Single selection
- Optional
- **Note:**
  - the field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

- **Scan Barcode**

- Text input field
- Allows the user to enter or scan a barcode.
- optional.
- Accepts letters,numbers and special characters.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- Note:
  - When a scan barcode option is selected, the system opens a device camera to scan a barcode and automatically populates the field with the scanned value.
  - If the user enters a barcode manually at a slow typing speed, the entered value is automatically cleared

- **Scan Mode**

- Checkbox
- **Notes:**
  - When checked, the user can use the [Scan Barcode](#) field to either enter the barcode manually or scan it
    - With each successfully scan, the **Quantity** is automatically increased by 1
  - When checked, and the user doesn’t enter or scan any barcode in the [Scan Barcode](#) field:
    - An error message appears upon clicking on Save.

- When checked, the user cannot enter the Quantity manually
- When checked, it disables auto fetching of existing Quantity
- **Items**
  - A table contain the following columns:
    - **Checkbox icon**
      - Multi selection
    - **No.**
      - Displays the ordering of items in the table
    - **Item Code**
      - Searchable DDL
      - Link “Item” doctype
      - Single selection
      - Mandatory
      - If the field is left empty, an error message will appear.
      - **Note:**
        - The field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.
    - **Warehouse**
      - Searchable DDL
      - Link “Warehouse” doctype
      - Displays only child warehouses where the “Is Group warehouse” option is disabled.
      - Single selection
      - Mandatory
      - If the field is left empty, an error message will appear.
      - **Note:** The entered value takes priority and is not affected by the value selected in the [Default Warehouse](#) field.
    - **Current Qty**
      - Label field (read only)
      - Based on the selected item and warehouse:
        - If the selected item has no batch and serial numbers
          - The system displays the **Actual quantity** based on the selected warehouse in the Current Quantity column.
        - If the selected item has batch and serial numbers:
          - The **Batch No** column is displayed, and the current quantity is set to zero.
          - Once a batch is selected, the system retrieves the quantity available in that batch in the current quantity column.
    - **Quantity**
      - Text input field
      - For entering the reconciliation quantity for this item.
      - Mandatory.
      - Accepts numbers only.
      - Minimum length: 2 characters.

- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- An error message will appear if the entered text is less than the minimum length.
- It has a default value “Zero”
- If the field is left empty an error message appears.

#### ■ Stock UOM

- Label field (read only)
- Displays the item default UOM

#### ■ Valuation Rate

- Text input field
- Used to enter the item valuation rate that will be used to update the inventory value.
- Optional
- Accepts numbers only.
- Minimum length: 2 characters.
- Maximum length: 100 characters.
- Once the maximum limit is reached, further input will be prevented.
- An error message will appear if the entered text is less than the minimum length.

#### ■ Batch No

- Searchable DDL
- Link “Batch” doctype
- Single selection
- Mandatory only when an item has batch No is selected
- **Note:** it appears only when an item has batch No is selected
- If the field is left empty, an error message will appear.
- **Note:**
  - The field shall be implemented as a searchable DDL (autocomplete), allowing the user to search and select from a predefined list of values.

#### ■ Setting

- When clicked, a pop up appears contains the following options :
  - Rearranging table columns using drag and drop functionality.
    - Users can click and hold a column header , then drag and drop it into the desired position within the table.
  - Column width
    - Text input field
    - For entering or edit the column width
    - Accepts numbers only
    - Minimum length: 1 character.
    - Maximum length: 3 characters.
    - Default value = 3
  - Add / Remove columns
    - Button

- For adding or removing columns from the table
- When clicked, a pop-up appears containing all available table columns with their corresponding checkboxes.
- These columns are:

| Column Name                        |
|------------------------------------|
| Item Code                          |
| Warehouse                          |
| Current Qty                        |
| Quantity                           |
| Stock UOM                          |
| Valuation Rate                     |
| Barcode                            |
| Has Item Scanned                   |
| Item Name                          |
| Item Group                         |
| Amount                             |
| Allow Zero Valuation Rate          |
| Add Serial / Batch No              |
| Use Serial No / Batch Fields       |
| Reconcile All Serial Nos / Batches |
| Serial / Batch Bundle              |
| Current Serial / Batch Bundle      |
| Serial No                          |
| Batch No                           |
| Current Amount                     |
| Current Valuation Rate             |
| Current Serial No                  |
| Quantity Difference                |
| Amount Difference                  |

- Users can show or hide columns by selecting or deselecting the related checkbox.
- **“Update” button**
  - Button
  - For save any changes or updates made by the user
  - When clicked, any modifications made by the user will be saved
- **“Reset to default” button**
  - Button
  - To reset all modifications to their default values.
  - When clicked, any modifications made by the user will be reset to their default values.
- **Note:** when a row is selected , an action bar appears showing the following actions:
  - **Delete row**
    - Button
    - To delete a specific row or multiple rows
    - When clicked, the selected item(s) will be deleted
  - **Edit Row**
    - Clickable icon
    - Users can edit and view non displayed fields in the table.
    - When clicked , a pop up appears containing the following fields:

| Field Name | Options                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
